Cars Tumble On Cicero Ave. In Freight Wreck One Killed, 4 Injured

One transient man was killed and four others were severely injured Wednesday mid-night in a railroad wreck on the Rock Island railroad that sent eight freight cars onto the Cicero ave., pavement scattering seven others along the embankment near 157th street at Oak Forest.

Several motorists narrowly escaped being crushed as the cars came tumbling onto the highway. One driver seeing the dust first thought it was fog, and stopped barely in time to avoid crashing into the wreckage which filled the subway under the tracks up to the top of the bridge. One box car was pushed up the embankment on the north side of the Cicero ave., pavement and missed hitting a brick pump house by about six inches.

A car load of coal was turned up side down on the other side of the bridge.

The derailment was caused by a "hot box" resulting in the breaking of an axle of the rear truck of the seventh car of the 80 car Chicago bound freight train. The next eight cars strewn along the right of way, crashing one on top of another on to the main arterial highway which passes beneath the tracks.

The next seven cars turned over and strewn along the right of way, while the next three cars were derailed, but remained upright.

A car loaded with shelled corn burst open when it hit the pavement and corn was strewn in all directions. H. F. Brueggemann, elevator man of Tinley Park bought this corn and had trucks hauling it to Tinley Park.

A carload of lime which was also smashed in the wreck scattered a white mantle over most of the wreckage.

The man killed was identified from cards in his pocket as Henry Walter Frank, 55 years old of Kansas City.

Those injured who were taken to the hospital at the Oak Forest Infirmary are:

A man identified from cards in his pockets as Sidney Cromwell. Physicians said he probably will die from a skull fracture and injuries to his chest.

Charles Sobush, 2424 Augusta street, Chicago, several ribs broken. Frank Dundon, of Binghampton, N. Y., possible broken spine.

Kenneth Spencer, of the Portland Hotel, Kansas City, Mo., several fractured ribs.

Both main lines of the railroad were tied up for three hours until the west main was opened for traffic and this one line was used by all the railroad traffic for the rest of the day.

Railroad crews were immediately dispatched to clear the highway and tracks, but this work, it was indicated, would not be completed for another day.

Traffic on the highway was blocked and rerouted over 121st and 159th street.

James Hickey, Oak Forest undertaker, was on the scene of the accident shortly after it occurred and assisted in getting the dead and injured out of the wreckage.

Hundreds of people flocked to Oak Forest to see the wreck and the state highway police were kept busy keeping the people from getting too close to the wreck.

Orland Legion Post Sponsors Boy Scout Troop

The Orland Park American Legion Post No. 526 is sponsoring a Boy Scout troop. The charter has been applied for. Thus far ten boys have been enrolled as charter members. They are: M. Balleau, B. Cox, B. Lillwitz, B. Toelle, J. Toelle, L. Yates, M. Yunker, E. Yunker and L. Cannon.

The local Boy Scout Committee consists of F. H. Glahn, W. R. Schussler, Jr., George Cox and C. E. Maddox. Two more members of the committee are to be selected from the community.

Ralph Town has been named as Scout Master. Mr. Town is in the employ of the Bell Telephone Co., and has had a number of years experience in Red Cross and Scout work. Orville Schmaedeke of Orland Park, local undertaker, has been appointed as assistant Scout Master.

The Scouts are to meet every Monday night in the Legion Hall in Orland Park. On the night of May 16 installation ceremonies will be held in the local Legion hall.

This is a very noteworthy project and boys from 12 to 17 years are eligible to join and an invitation is extended to boys of this age in this community to join the Scouts. The Orland Park Legion Post is to be highly commended for sponsoring this splendid boy's organization.

YOUTHFUL PALOS FIRE BUGS SEIZED BY OFFICIALS

Two youthful firebugs of Palos Park were arrested last week after suspicion was directed to them by their strange behavior following numerous fires in Palos of late.

At the Hynek Coal yard fire which caused a loss of about \$10,000, Fire Chief John Helenhouse of the Orland Park Fire Dept., became suspicious that the fire was of incendiary origin. He notified the State Fire Marshall's Office. Last week Frank Dougherty of this office and a representative of the Fire Underwriters Board of Chicago together with Fire Chief John Helenhouse went to Palos Park and called on the two youths under suspicion. They first called on Jimmy Barnes who refused to talk. Next they went to Edw. Frocke who broke down and confessed and implicated Barnes. Then the two youths, both 20 years old were brought face to face. They confessed setting fire to the Hynek coal yard. They also confessed to burning down a nine room vacant house in Palos. They broke into the place and placed a lighted candle on the floor, placing a pile of inflammable rubbish about the candle. As the candle burned down the rubbish became ignited and set fire to the building.

They also confessed setting a number of prairie fires. Both were taken to Chicago and placed in the county jail. Monday they were cited to the grand jury and now awaiting the action of that body. Both are facing arson charges with sentences of 1 to 10 years.

Both boys are said to have a maria for fires.

Southwest Sub. Baseball Season Opens May 15

The Southwest Suburban Baseball League will open the baseball season May 15th when the Orland team will play the strong Calumet Park team at the latter's diamond in Calumet Park at a night game.

Hans Stecker, the Calumet Park sponsor has built a new stadium to seat 2500 people and has also installed a \$10,000 lighting system for night games.

The Orland Park team is being sponsored by Ray Brennan who also sponsored a basketball squad last winter. This squad had a very successful season and an equally successful baseball season is anticipated.

The games will be held every Sunday from May 15 on to August 14.

Calling All Base Ball Fans

First appearance of the season next Sunday April 24. Mokena Orioles and any and all players and fans will get together at Heyden's Field for a warm up and a general get-together, to discuss ways and means for this season.

Lets all get out and pull together to try and put over a real baseball team and another winning team. We didn't do so bad last year, winning first place in the Joliet league.

We might even have two teams this year. This would insure more home games for our town and serve to get us a good crowd of fans. See you all Sunday. I hope, I hope, I hope.

J. HEYDEN.

Lincolnshire To Hold Grand Opening

The Lincolnshire Barbeque at Harlem avenue and Lincoln Highway is going to hold a grand opening the evening of May 6th featuring their new \$1700 Hammond electric organ. Phil Adams of Kankakee will preside at the console of this fine new organ. A good time assured for all, so come.

New Radio Shop For Orland Park

Merrill Cooper will open a new radio and electrical shop in Orland Park in the James Creer building next door to the Creer Grocery store and market.

Mr. Cooper will handle a line of auto radios, Zenith sets, General Electrical appliances and Refrigerators. Mr. Cooper expects to open May 1st.

Fisherman Arrested For Fishing On Private Property

Tuesday afternoon a man and two women appeared at the Orland Lake to fish but refused to pay the 25c fee charged by Geo. Gee, Sr., on whose property this particular part of the lake is located.

The care taker, Walter Jungles notified Mr. Gee who came to the lake and found the fisherman had been there several weeks ago and had paid the fee. But after talking to the man, Mr. Gee was surprised that the fisherman had the idea he was on State property and therefore would not have to pay anything. The Southwest Highway is near the lake and he insisted that 100 feet on each side of the highway was State property. When Mr. Gee found it was useless to argue the matter further he called Constable John Helenhouse in Orland. The latter went to the lake and when the fisherman insisted he was on state property, constable Helenhouse told him he had better come along and tell it to the judge.

Mr. Gee, the constable and the fisherman then proceeded to the justice court of Judge Ray Brennan at Keane and 159th st. After hearing the points at issue the judge ruled that the fishing code was being violated and read the statute covering this code in which it is written that no one can fish on private property without the owner's consent. The judge further pointed out that the right of way of highways is 100 feet wide, the distance being figured as 50 feet each side from the center of the road. When the man refused to pay the 25c fee to Mr. Gee and insisted he was on state property, Mr. Gee signed a complaint against him. The man gave his name as Louis Weber, 11816 S. Michigan Ave., Chicago. His hearing was set for next Tuesday afternoon. When asked by the judge if he had a fishing license, Weber said he had left it in his fishing kit.

He was required to post a \$25 bond and to appear for trial next Tuesday. Weber threatened to appeal the case to a higher court and also threatened to have constable Helenhouse arrested for picking him up. The fact of the case is that Constable Helenhouse did not tell Weber he was under arrest, but told him to see the judge and he was not arrested until Mr. Gee signed the complaint against him.

Another point Weber endeavored to raise was, that there are no signs in the lake indicating it is private property. Mr. Gee has had signs to that effect erected in the lake but they are repeatedly removed by the strangers fishing in this lake.

Mokena High School To Present Play

"As the Clock Strikes" a three-act comedy mystery is to be presented by the pupils of the Mokena High School next Friday night, April 29. Come out and see if you can guess who stole Madge Keating's (Marie Rinke) pearls. Did the mysterious stranger, Lucius Dreer (Fred Clark) have anything to do with their disappearance? This is a mystery play that is "different" and there are plenty of laughs for those who like comedy. Other members of the cast are Hans Muehler, Mildred Cooper, Clara Stankus, Charles Hostert, Marvin Cappel, Ejnar Monson, and Robert Clark.

To Present Play At Tinley School

The Tinley Park school auditorium will be a place of a lot of fun and laughs April 27 when a three-act comedy, "Bound To Marry," will be presented by St. John's Walther League of Cooper's Grove at 8:15 p. m. DST, directed by Mrs. Hy. F. Meyer.

Their plays each year have been a huge success and they intend it to be the same this year.

Those taking part are: Adela Cohrs, Oscar Niefeldt, Wilma Meyer, Marvin Meyer, Hilda Stelter, Wm. Stelter, Helen Stelter, Arthur Heimsoth and Pearl Wille.

Music will be furnished between acts. So if you are looking for an evening of fun be sure and be there and you will not be disappointed.

Mokena Band Preparing For Annual Concert

The Mokena band is making preparations for their annual concert on May 6th.

A beautiful table lamp to be given as a door prize is now on display in the Bruns barbershop. You need not be present to be eligible for the prize to be awarded the night of the concert. Mrs. George Merrick will have charge of tickets. Mrs. Henry Shevlin and Mrs. I. D. Marti will have charge of candy and cracker jack sales.

FORMER MOKENA TEACHER DIES AT 77 IN JOLIET

M. J. Cunningham, well known Will County educator who taught in the old Mokena public school which formerly stood at the east end of the village, died Thursday afternoon at 1:30 o'clock in his home, 261 North Raynor avenue in Joliet. He was 77 years old. He taught in the Mokena school about 30 years ago.

Mr. Cunningham was born in Manhattan, was educated in Joliet, graduating from the township high school. He attended Normal College at Valparaiso, Ind., taught in Kankakee county and in Mokena, New Lenox and Spencer and for 29 years prior to his retirement at the end of the 1936 school year, had been principal of the Moran street school in Joliet.

He is survived by his widow, Mrs. Catherine Cunningham, three daughters, Mrs. Raymond Smith, Joliet; Mrs. Mortimer Berman Springfield; one son, Leo Cunningham of Joliet and a sister, Mrs. Catherine Bergan of Manhattan.

At time of going to press funeral arrangements had not been announced.

M. W. A. Hold Dance Tonight

The Mokena M. W. A. and R. N. A., will hold a card party and dance at the Hatch hall in Mokena, Friday night, April 22nd.

Mokena Gardeners War On Dogs

Mokena people who have made gardens are wroth over the manner in which dogs are uprooting the things planted and threaten a wholesale slaughter of dogs whether they have a dog license on or not. Dog owners should keep their dogs tied up if they don't want to have them shot.

State Health Official To Speak At Mokena School

Arrangements have been made for a community meeting to be held Tuesday, May 3, 1938 at 7:45 p. m., Daylight Saving Time in Mokena School Auditorium.

Dr. A. J. Levy, who is connected with the State Department of Public Health, will be present to give valuable information in safeguarding the health of the children and community in general.

Dr. Levy has had a vast amount of experience in formulating plans to control and prevent diseases prevalent among children of all ages. He is prepared to discuss and answer any questions pertaining to public health.

This is the first opportunity the people of this community have had to receive information of this kind from one who is highly qualified to impart it. Since the State Department of Health has made it possible for the public to obtain this much-needed information which he is prepared to give; it is hoped that the people of Mokena and surrounding territory will attend in large numbers.

This program is being sponsored by organizations of Mokena.

F-Men Voted Aid At Town Meeting

At the recent New Lenox town meeting, it was voted to allow the F-men of New Lenox township a town fund up to \$100 to pay for expenses incurred in their work in the township. A 30c relief tax was also voted.

Mokena Garden Club To Hold Sale

The Mokena Garden Club will hold its annual flower and vegetable sale Tuesday April 26 at 2 p. m. at the depot.

Anyone having a surplus of plants of any kind and want to donate them to the club for this sale should notify any member and they will gladly respond.

Don't forget. Time, 2 p. m. Place the depot. Date, April 26.

Notice.

The change of clerk in the Mokena postoffice was brought about when I was removed from this position because I voted the Republican ticket on primary day, April 12, 1938.

NORA GROTH—Adv.

Chas. Erickson New Sales Manager For Livestock Market

Charles Erickson, well known Mokena auctioneer has bought an interest in the New Lenox Live Stock Market and succeeds Wm. E. Berry as sales manager of the market. He has charge this Saturday at the place of holding sale on the J. C. Brisbane farm east of New Lenox. C. B. Drake of Joliet will continue as auctioneer.

Seize Runaway Boys In Frankfort

Monday afternoon the Rock Island depot at Mokena received a message to stop a west bound freight train at Mokena and take off three small boys wanted by the Blue Island police.

When the train stopped the urchins hoped out of a box car and ran south thru the Fred Yunker field and then headed east to Keane ave. A group of Mokena boys followed in a car along a gravel road and finally caught up with the boys. When the Mokena boys advanced toward the trio, one of them pulled a knife on one of the Mokena boys and then managed to run away. The same evening the youthful "tough guys" were caught by Ernest Bennett as they were about to hop a "J" freight. They were returned to Blue Island. The youngest lad in the group was seven years old. Two were Greeks and the third one was an Italian.

To Observe 15th Anniversary

The St. John Evangelical church at Mokena are planning to hold a special service on May 15th in honor of the 15th anniversary of the dedication of the church.

Time Changes Sun.

Don't forget new time starts on this Sunday morning so be sure to set your time pieces one hour ahead when you retire Saturday night so you won't be late for the church service Sunday morning.

Frankfort Town Reports Published In This Issue

In this issue will be found the annual town reports of the Town of Frankfort. There are four separate reports, Relief, Hard Road, Road and Bridge and Town accounts. Read them over carefully. Receipts and expenditures are set forth in detail for your information.

Rob New Lenox Oil Co. Office

Sunday night thieves broke into the office of the Weeks-Marland Oil Company at New Lenox and stole \$15 in cash and \$10 worth of tools. The sheriff's office was notified. No trace has been found of the robbers.

Coming Events

Friday, April 29, the Mokena high school class play: "As The Clock Strikes" will be presented in the Mokena school gym.

May 6—Mokena Band Concert. April 27—Play, sponsored by Walther League, Cooper's Grove, in Tinley Park school gym.

April 23—Old time dance, Saenger hall, Tinley Park.

CHICAGO TEACHER DIES OF AUTO INJURIES

Miss Dora Eldred, 28, Chicago school teacher, died Monday morning from a skull fracture and other injuries suffered when her Easter trip ended in tragedy in an automobile accident last Friday afternoon near the intersection of routes 30 and 45 north of Frankfort.

She and her companion were rushed to the Brannon Memorial clinic at Manhattan, where Miss Eldred died.

Her companion, Miss Alice Kasling, 27 suffered a fractured right wrist and contusions. Her condition is improved according to Dr. Landon B. Brannon.

Miss Eldred's parents, Mr. and Mrs. Richard Eldred of Climax, Michigan, came to Manhattan and were with their daughter at the time of her death. Miss Eldred never regained consciousness.

Her automobile collided with a car driven by Joseph Pelton, 34 years of Findlay, Ohio, who was not injured.

Tinley Business Men Meet With New President

The Tinley Park Businessmen's Association held their first meeting with the new president, H. C. Vogt, Monday night.

Members were appointed on the sick, membership, and advertising committees.

The members discussed at length about closing their places of business for half a day once a week and to keep open one night in the middle of the week, but nothing definite was decided on.

Following the business session, a social hour with cards, and refreshments was enjoyed.

Can Illegal Coin Operated Machines Be Licensed?

State wide interest is centering on the action of the Joliet township board in passing an ordinance to license all coin operated machines and music boxes in the township at a license fee of \$50 a year.

The attorney general and the Will County state's attorney have ruled that certain kinds of coin operated machines are illegal and the question arises "How can anything illegal be licensed?"

Woman's Club Will Dedicate Constitution Tree

On Arbor Day, April 22nd at one thirty p. m., the Third Congressional District, Illinois Federation of Womens' clubs, through the cooperation of the State Highway department, is planting a Constitution Tree at 119th St. and Western Ave. Mrs. Warren B. Robinson, American Citizenship chairman and Mrs. Geo. B. Ward, Conservation chairman have made arrangements and provided the program.

Orland Legion Post To Hold Dance

The Orland Park American Legion Post will sponsor a dance at the Goodings Grove dance hall on Saturday night, April 30th. Inks Melody Boys are to furnish the music. Everyone welcome.

CONFIDENCE...

In a bank, is born the reliable service it has rendered in the past: its conservative policy, the substantial amount of its capital and surplus and, above all, the integrity of its personnel. That THIS BANK has measured up to those qualifications is attested to by, by the fact that depositors continue to "back it up" by trusting it with their savings. And their number is constantly increasing, we are happy to say.

Ohio's 'Bookmobiles'

Forty-five million Americans are without library service. In Ohio, assisted by WPA, community libraries are fighting this situation with branch stations. One is in a chicken coop, others in schools, private homes and general stores, where 30 to 40 books are left periodically for the community's enjoyment.

But the most unusual method is "bookmobile" distribution, now used by 14 Ohio libraries and soon to be adopted by others. Ohio did not invent the bookmobile; this device dates back to Hagerstown, Md., where the Washington county library began using it in 1904.

WPA workers handling book distribution are amazed to hear full-grown men and women ask for Mother Goose stories, neglected in their childhood because library books have never before been available. Although

Ohio leads the nation in library activity, 1,600,000 residents of the state still have no library within reasonable distance of their home.

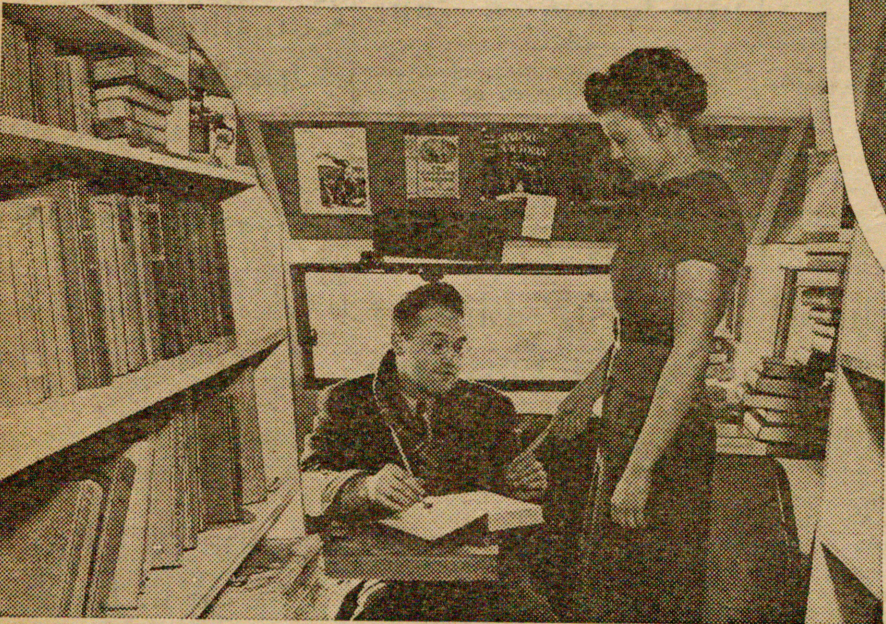

It's a great day at rural schools in Clark county when the Warder public library bookmobile from Springfield arrives with 3,000 volumes, distributed among the youngsters by attendants under WPA sponsorship.

The bookmobile at the left came from the library above, just as Mohamet came to the mountain because the mountain wouldn't come to him. This library's circulation has been multiplied since the bookmobile plan was inaugurated.

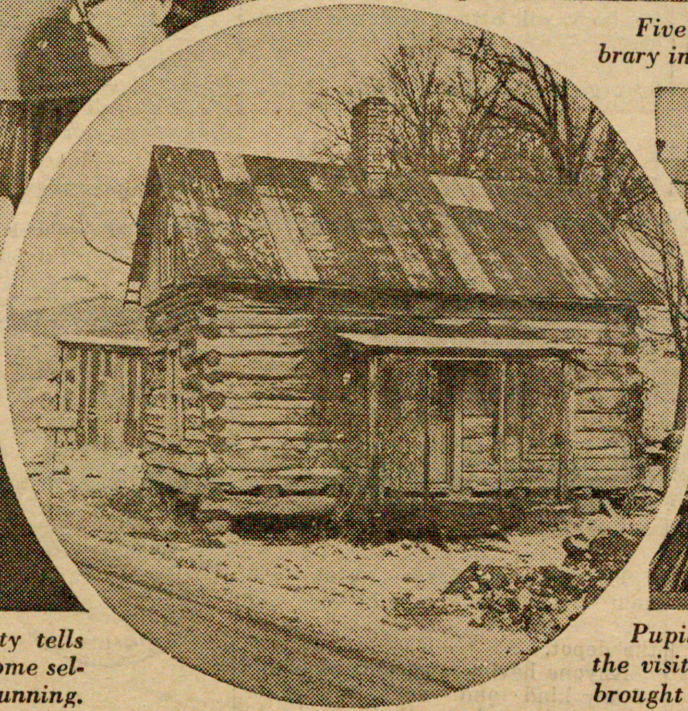

An intricate card index system is used to check books in and out. "Customers" of the bookmobiles come from every walk of life, but few are the youngsters who fail to take advantage of this unique educational venture.

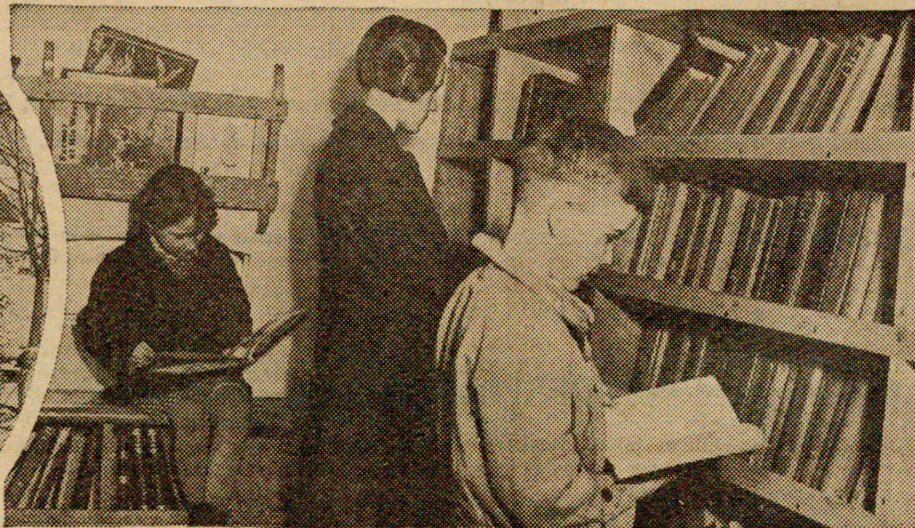

Drivers of bookmobiles must know how to check books in and out. This bookmobile comes from the Circleville library and serves 33 places in Pickaway county. The driver is paid by WPA. He is one of several hundred Ohioans engaged in library extension work under federal sponsorship.

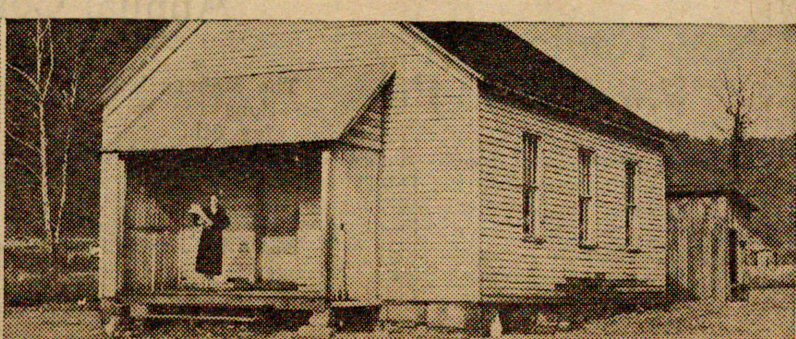

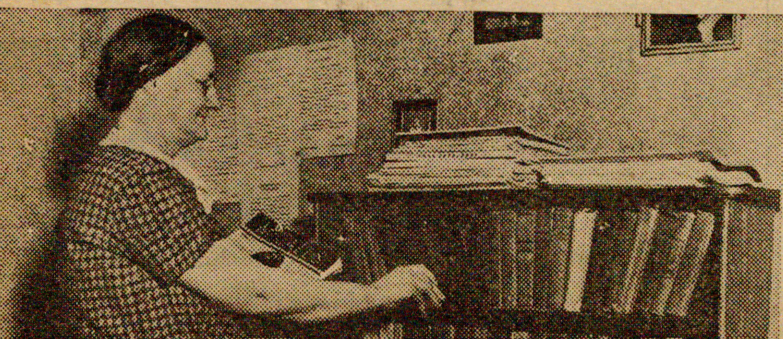

Mrs. Molly Cunningham of Jackson county tells her patron about Tom Sawyer. Right: This home seldom saw books until the bookmobiles began running.

Five miles north of Pomeroy, the Meigs county extension service operates a library in a Laurel Cliff chicken coop. Earl Brown, at the door, is librarian.

Pupils of Athens county schools are permitted plenty of time to browse during the visits of the Nelsonville public library bookmobile. Storybook treasures are brought them by a modern literary argosy, a rolling fund of education.

CLASSIFIED DEPARTMENT

PATENTS

Patent wanted—Will purchase outright or pay royalty on meritorious invention. No patent pending ideas considered. Send full information. Box 169, Niles Center, Illinois.

"Man! Is it Good!" Say Folks About Pepsodent with IRIUM

Irium contained in BOTH Pepsodent Tooth Powder and Pepsodent Tooth Paste

No matter how long your teeth may have been clouded by dull, unsightly surface-stains, the regular use of Pepsodent can bring about a remarkable improvement. For Pepsodent is more effective. Why? Because Pepsodent alone contains Irium!... Irium helps Pepsodent to brush away those dingy surface-stains that hide the true brilliance of your smile... and then polish your teeth to all their full natural radiance! Contains NO GRIT, NO FUMICE. Try it!

dent alone contains Irium!... Irium helps Pepsodent to brush away those dingy surface-stains that hide the true brilliance of your smile... and then polish your teeth to all their full natural radiance! Contains NO GRIT, NO FUMICE. Try it!

DORIS DENE'S COLUMN

Proximity Best Ally to Young People Who Think They're in Love.

DEAR MISS DENE: I have only one daughter whom I have to support. My work takes me all over the country so I am not with her much. She is sixteen now and has fallen in love. The boy is perfectly all right, and his family are delightful people. I tell her that she is too young to marry. This is her first love affair. The boy's family have suggested that my daughter come to live with them for the next two years. This will mean taking her out of boarding school but it will give her time to test her love which I think is the most important thing.—Mrs. D. B.

ANSWER—The trouble is that two years of constant companionship with her first love may simply allow your daughter to slip into a rut. Proximity is Cupid's best ally when boys and girls are young—and in love with the idea of being in love. There may be no earthly reason why your girl shouldn't marry her Romeo—but you think yourself she should be given the chance to discover whether she's experiencing the genuine blue white emotion or not. And I suggest that while she lives with her fiancé's family—who will take care that she sees no other boys and has no opportunities to make other friendships—she isn't going to get any proper perspective on her love affair at all.

Keep her at school and let her mind keep on growing up. Let her be where she will have opportunities to meet other men. Let her develop outside interests through her school life. In that way you'll be equipping her to be sound-minded so that one of these days she can depend on her own judgment and be competent to choose a husband for herself. You see most girls of sixteen would like nothing better than to be almost-engaged-to-be-married with both families encouraging the romance as hard as possible. At sentimental sixteen we ask nothing better than that life should be one long love story.

Fortunately few of us attain this heavenly state. Against our will we are kept at school, we are constantly jacked up to common-sense standards—we are urged to cut out foolishness and to pay attention to the business of getting ourselves educated. We hate it at the time—but in the end we find that we have been saved from making a mess of our lives. The very treatment against which we rebelled has prevented us from becoming serious about Tom, Dick or Harry who is the first boy who ever cast languishing glances in our direction, and who might easily have become our beau ideal if we hadn't been rudely ridiculed out of romance.

Now your daughter, Fond Mother, is just another sweet sixteen, all wrapped up in her great love affair, and probably purring with happiness because Fate is propelling her in exactly the direction she wants to go.

Taken away from school she can devote all her time to the business of being in love—she can become daily more absorbed in the hero of her dreams who even if he doesn't fulfill all her expectations, will soon become a habit with her. Don't you see that in allowing her to have this experience, you are depriving her of the discipline and the common-sense which would make a real person of her—and give her opinion and ideas of her own with which to confront the world?

I honestly think you would be doing the kindest thing, in insisting that your girl keep on with school—that she make new friends—and that the engagement be postponed.

DEAR MISS DENE: Is it unreasonable of me to demand that my husband show me affection? Other wives are constantly showered with affection in my presence, and I am treated as if I'd been married for fifteen years. My husband says I am unreasonable. Am I?—Amy.

ANSWER—Probably you are, Amy. If you married an undemonstrative man you knew what you were in for and it isn't fair for you to start complaining now because a reserved fiancé has turned out to be, quite naturally, a husband who objects to showing his affection in public.

You must admit that the fact that a man is demonstrative doesn't actually make him a good husband. There are plenty of traits more handy to have around the house than the faculty for incessant love-making. Begin to count your blessings, Amy, and see whether after all the other women's husbands are as kind or generous or sweet-tempered, or easy going as your own.

And don't forget that nothing can be worse for your undemonstrative spouse than your constant reminders that he is a perfect frost. The more you tell him about his shortcomings, the more disinclined he'll be to show affection. His reserve rises from shyness anyhow, and you can't cure shyness with nagging criticisms.

Be sensible and thank Providence for all the good qualities you've annexed in one man. Hang on to your sense of humor and let go some of your vanity. You're worried mostly about this situation because the other wives are getting something you've missed. Just pause to consider that you wouldn't change your own silent but devoted life-partner for all the petting sheiks in the world.

Bumper Wheat Crop

Wheat Crop — Crop experts predict that the largest winter wheat crop since 1931 is in the making and estimate that the crop will run to 717,000,000 bushels, which would be some 30,000,000 bushels greater than last year's crop. It is believed that the winter wheat crop alone will exceed domestic needs by some 70,000,000 bushels. Unless a sudden demand for wheat develops from abroad it is likely that farmers will receive less for wheat this year than in several years past. Early last week May wheat declined to approximately 80 cents a bushel, lowest it has been in three years, then British flour makers began to buy and the price rose.

TINLEY PARK

Mrs. Herman Englehardt was a patient in St. Francis hospital for three days last week.

Mrs. Viola L. Carr left Tinley Park Tuesday morning for Staten Island, New York City because of the serious illness of her mother, but arrived too late as her mother passed away early Wednesday morning. Her mother, Mrs. T. Marcellus Merrill was aged 65 years and death was caused by heart trouble which she had been afflicted with for the past two years. The deceased is survived by her husband, two sons, Clarence and Eugene and one daughter, Mrs. Carr.

TINLEY PARK WOMAN'S CLUB

The annual meeting of the Woman's Club will be held Wednesday afternoon of next week in the M. E. church. Roll call will be responded to by helpful suggestions for next year's work. Reports will be read and the election of officers will occur. At eleven o'clock, Mrs. Kester will discuss the origin and development of the English language.

The Busy Bee Club of Tinley Park gave a tea on April 14 in honor of their mothers in the home of Joan Crist. Mrs. Florence Anderson was the special guest of Dorothy Stockman. She gave each girl a cluster of flowers which she made, to wear on their coat. The girls appreciated her thoughtfulness.

August Mesenbrink was awarded the pair of pillow cases, the money from the ticket sale on them will be used to visit some interesting places in Chicago. The open faced sandwiches and gelatin salad and pretty decorated cup cakes were made by the girls themselves, under the direction of the club leaders, Mrs. Crist and Mrs. Stover.

Mrs. J. E. Swisher and son Jack returned Wednesday afternoon from a motor trip to London, Ontario, where they spent the Easter holidays with the former's sister.

Robert Funk who underwent an operation last week in St. Luke's hospital in Chicago is improving nicely.

Rev. Albert Buddenhagen attended a Lutheran church convention the forepart of the week in Chicago.

A number of measles cases have made their appearance in Tinley Park.

Mrs. Chas. Nielsen who is a patient in St. Francis hospital in Blue Island is somewhat improved.

The Ladies Aid of Zion Lutheran church will sponsor a bazaar, luncheon and card party in the school gym on May 4th. Everyone invited.

George Schreiber spent Easter in Chicago with relatives.

Dr. and Mrs. Clayton Enoch of Chicago are moving to Tinley Park this week. Dr. Enoch has been operating a dental parlor here in the Schreiber building for some time.

IN MEMORIAM

In memory of our dear wife and mother whose loving care and devotion has been our sweetest memory through the past year that we have been without her.

CHRISTIAN SCIENCE CHURCHES

"Doctrine of Atonement" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, April 17.

The Golden Text was, "I and my Father are one" (John 10:30).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "Create in me a clean heart, O God; and renew a right spirit within me. The sacrifices of God are a broken spirit: a broken and a contrite heart, O God, thou wilt not despise" (Psalms 51:10, 17).

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Dost thou love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind? This command includes much, even the surrender of all merely material sensation, affection, and worship. This is the El Dorado of Christianity. It involves the Science of Life, and recognizes only the divine control of Spirit, in which Soul is our master, and material sense and human will have no place" (p. 9).

Hybrid Corn Makes Quickest, Greatest Use of Manure

Dairy farmers of this region will always have the problem of how to get the most out of manure and yet never have a mathematical answer to their problem. It is because of the difficulty in getting a check-up on plant utilization of manure in our ordinary farming practices that we have such a wide range of practice among the farmers even of a given locality.

The chemical element of economic importance in manure is nitrogen and as a rough rule seventy-five per cent of the nitrogen portion of the feed intake of the common farm animals passes into the excreta and is available as plant food in the manure. Very seldom, however, do we get anything like the full use of this possible seventy-five per cent—most often less than a third of it.

The sanitary requirement that manure should be hauled away from the stables and barns and thus taken

direct to the field (although considered as a burden and hardship) most often operates as a benefit as it avoids the losses of leaching that usually occur in the barn yard pile and barnyard storage. We have, of course, losses in the field, particularly of erosion, when applied on top of the frost crust and that occurs before the manure can be worked into the soil. We have also losses by leaching of soluble nitrates which occurs during the dormant periods when there are no growing plants to absorb them.

The corn plant of our common crops is the greatest user of manure nitrogen and particularly so per unit of time during the period of active vegetative growth of the corn. The period, however, within which corn can absorb the soluble nitrates from manure is a short one and limited. It is that vegetative period that extends from germination to its close at pollination with kernel embryo fertilization of the plant. From then on the corn plant does not absorb any more soil nitrogen but its own feeding roots that previously absorbed the nitrates are themselves being absorbed and their substance translocated to make the ear or

grain. With the growing corn plant in our region this vegetative period has an average range of about from seventy to eighty days. You can all figure it out from your own experiences beginning from germination to fertilization by the pollen.

Soil nitrates not utilized by the corn are lost by leaching unless absorbed in the growth of weeds or in the production of humus through combining with the carbon of cellulose residues (the ration of the latter being twelve of carbon to one of nitrogen and which we often speak of as the 12 to 1 carbon-nitrogen ratio.) The conversion of manure nitrogen into soluble nitrates often takes place at its maximum rate just about the close of the corn vegetative period; hence, amounts to a considerable loss but there is little we can do about it. We don't want to use it growing weeds because the weeds will compete with the corn plant for water at a time when often water supply is at a most crucial point. We often, too, do not have the cellulose available from previous crop residues particularly on dairy farms because we have removed most of the cornstalks in the making of ensilage or straw for bedding and which is often largely lost by volatilization through oxidation in the manure pile. Hence, do not have a high utilization of the soil nitrates from manure in the production of humus.

We now appreciate how important it is that the corn we grow should make the very highest absorption and use of manure nitrates during this seemingly short vegetative period and it is the varying capacity of different corn plants to make use of soil nitrates that determines the measure of their yield.

Going into the matter deeper, we learn that phosphorus is a measure of the fixation of nitrogen as protein in the plant and when we try to reason this out we recall that phosphorus is the element concerned in root growth and can see that with the deeper rooting capacity of some corn varieties to get more phosphorus to build a larger root system to make a greater soil phosphorus and soil nitrate withdrawal coupled with utilization of the soil nitrogen, why then the plant that is a high phosphorus forager and feeder is the best nitrogen user and the highest yielding type of corn.

None of us want to experience the loss of manure nitrogen through leaching but are anxious that our corn plant can make the greatest use of it and therefore, we are interested in getting that type of hybrid corn that has fast and deep growing root development, faster and greater phosphorus feeding and assimilation capacity so that it will get a greater amount of plant food into its system when pollination of the kernel embryo cuts off and terminates plant food absorption from the soil. With this type of deep rooting hybrid corn we can with manure on the hilltop make this hilltop corn approach in appearance and yield the yield of the lower lying land below.

Most of us will recall the evenness of appearance of the Thomson Top-Yield Hybrid Seed Fields along the Lincoln Highway in Frankfort Town ship last summer. Most of us also with the expectancy to use hybrid corn in the future are anxious to learn all we can about its habits and possibilities so that we can get the greatest benefit and profit from its use. We want to know the particular hybrid that can make the best use of manure and therefore, we can run our planter rows across strips of ground with and without manure treatment. The picture we will have in the fall of the greater yield will indicate the difference in manure nitrogen that will be lost by leaching where not utilized by the corn we planted.

There are many of our farmers that still think that it is proper and good judgment to use hybrid seed for corn but that open pollinated corn is good enough for silage, yet most of these farmers will entertain the thought at times that good hybrid seed might after all be worth the difference for silo corn use. In order that we may have information regarding the difference in value between open pollinated seed corn and hybrid seed corn for silage use, we can plant some of each of the open pollinated and hybrid seed by putting the open pollinated in one planter box and the hybrid in the other or planting separate areas for silage use and noting the difference in load weight and corn quality when it is harvested for silage. The check-up on hybrid corn performance this coming fall will be interesting.

Labor Aids China

Labor Aids China — American labor last week declared that it has a vital stake in the war between China and Japan. Labor's committee for Civilian Relief in China announced that already 4,000,000 American workers had joined the movement which seeks to raise funds to aid more than 30,000,000 Chinese civilians who have been victimized by the Japanese invasion. The committee pointed out that if Japan succeeds in enslaving 420,000 Chinese and in gaining control of that country's resources, she will soon flood American and world markets with products made by cheap labor and force American factories to either lower wages or shut down completely. Tokyo carpenters get 57c a day, painters 68c a day, paper makers 40c a day, and women factory workers only 23c a day, according to the United States Monthly Labor Review.

PALOS PARK

The Orland Park Fire Department was called to Palos at one o'clock last Wednesday morning to extinguish a fire at Edward Hyink's coal yard, at 123rd street and 82nd Ave.

The fire swept away the largest buildings which contained building material, a large quantity of coal and coke, several hundred dollars worth of wood; about 400 rolls of roofing paper, a cement mixer, circle saw, and a Ford truck were part of the loss. The Orland firemen used chemicals to prevent the other large building from burning. The Worth Fire department put the fire out completely.

Fred Haack and Harold Johnson are new boy scout members.

Cordelia Manning was ill in her home with measles.

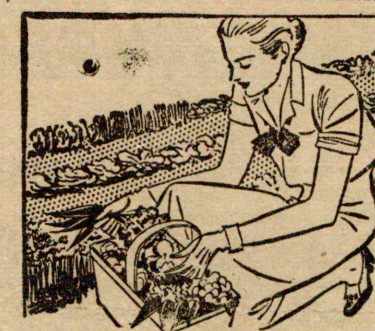

Palos Juniors met in the home of Patricia Saunders last Tuesday evening. Jane Muhlenhausen is a new member in the club.

A carnival will be given by the Palos Juniors at the Palos school on Thursday evening April 28 at eight o'clock.

Those appointed on committees are: Ethyl Pronger and Betty Jane Liszt, entertainment; Alice Crawford and Henrietta Baker, candy; Ruth Vail is chairman of the bakery committee; Patricia Saunders and Ruby Stockdale will have a "Hall of Horrors". Shirley Haack and Christine Hillig will have a rummage table, Marge Juneman, Louise Kriz, and Betty Jane Liszt will each have a booth. Entertainment included. Everyone welcome.

Queen Victoria Liked Music
Music was one of Queen Victoria's great interests throughout her life. The Etude says she played well on the piano, was taught the harp, and had a pleasing soprano voice. All the musicians of note who visited England were invited to appear before the queen.

A Good Man
A wise and good man does nothing for appearance, but everything for the sake of having acted well.

JOLIET, ILL.

Question Box On 1938 Farm Program

For the convenience of its readers, the Mokena News-Bulletin arranged with Farm Adviser L. W. Braham to answer a number of the questions asked by farmers as they call at the office of the Will County agricultural conservation committee to learn details of the 1938 farm program. Answers to the questions have been prepared in cooperation with the extension service of the College of Agriculture, University of Illinois.

Q.—Is the 1938 AAA program compulsory?

A.—No. The 1938 program is entirely voluntary.

Q.—Will corn acreage allotments be determined for all farms in Ill.?

A.—Yes. However, the allotment for some farms may be zero. Such farms might be truck, fruit or other farms that do not ordinarily produce any corn.

Q.—What percentage of the total corn production comes from the commercial corn area?

A.—The commercial corn area represents all of Illinois and Iowa and parts of Ohio, Indiana, Wisconsin, Michigan, Missouri, Minnesota, South Dakota, Nebraska, Kansas and Kentucky. This area comprises 60 per cent of the nation's corn acreage and produces between 60 and 65 percent of the total corn supply.

Q.—What was the basis for determining that the corn acreage should be reduced about 20 per cent in 1938 in the commercial corn area?

A.—The 1938 AAA Act provides that the corn acreage allotment figures should be set at that level for the commercial corn area which when added to the acreage normally grown outside the commercial area at normal yields would furnish with the carryover a supply 10 percent above normal consumption and exports needs.

Q.—In what year will corn loans be available?

A.—Under the 1938 AAA Act, corn loans will be available to co-operators in all years except 1st, when the supply of corn is less than the amount needed for domestic consumption and export; 2nd, when

the price is more than .75 per cent of parity; 3rd, when marketing quotas are rejected by farmers in a referendum.

Q.—Will corn loans be available to persons exceeding their corn acreage allotments?

A.—Yes. Corn loans will be available to those who exceed their corn acreage allotments in years when marketing quotas are in effect. However, such farmers will be able to obtain loans on that portion of their supply which they are to keep off the market and at a rate which is 60 per cent of the rate applying to co-operators.

Q.—When will the 15 cents a bushel penalty for marketing excess corn be applied?

A.—This penalty of 15 cents a bushel on corn is to be collected on the storage requirements in years when marketing quotas are in effect if that part of the production is disposed of instead of being held off the market and stored on the farm.

The Choice of the Corn Belt

The John Deere No. 999 has led the field for nearly sixty years. It's the fastest-selling corn planter in the world—unsurpassed for accurate and dependable performance, for its ability to open up a furrow, deposit the right number of kernels per hill, plant them in check, cover them at uniform depth, and press the soil down firmly. Variable drop. Clutch and gears are enclosed and run in a bath of oil, for smooth, quiet, trouble-free performance. Tractor hitch, tongue truck, fertilizer attachment, pea and bean attachment, and a wide variety of seed plates available. Come in and see it.

JOHN DEERE QUALITY IMPLEMENTS AND SERVICE

You Wouldn't Have Time for All This Reading . . .

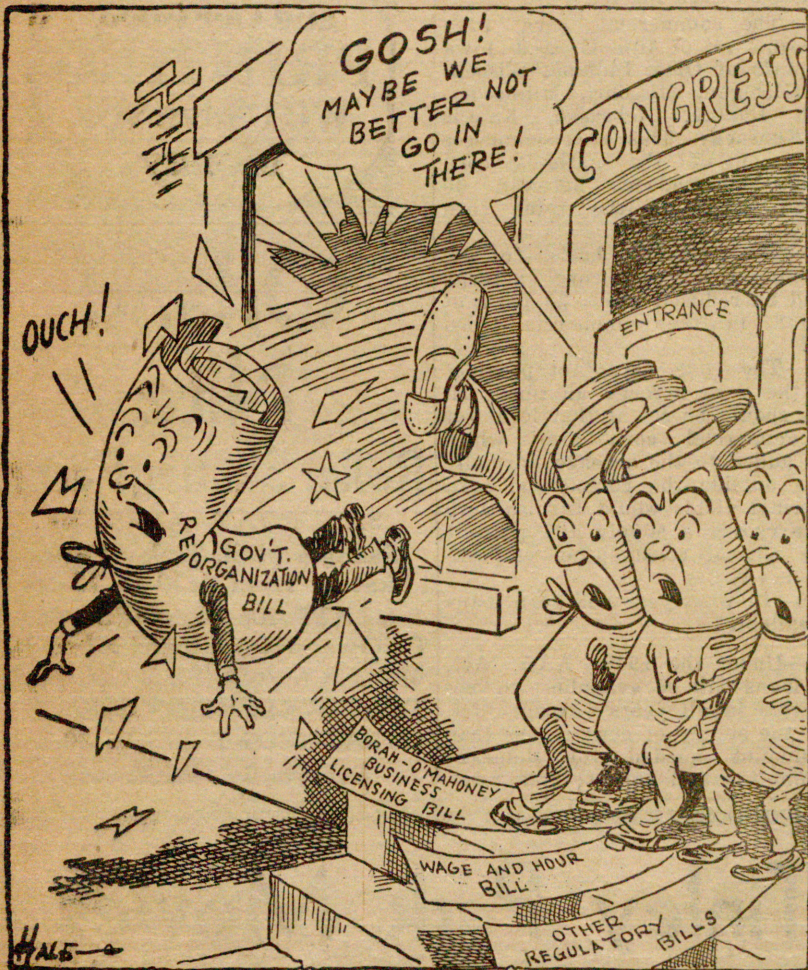

Every American wants to know more about the building of his nation than the schoolbook histories tell him, but few of us have time to pore over the many volumes necessary for that.

The illustrated feature articles by Elmo Scott Watson which appear regularly in this paper offer an answer to that need.

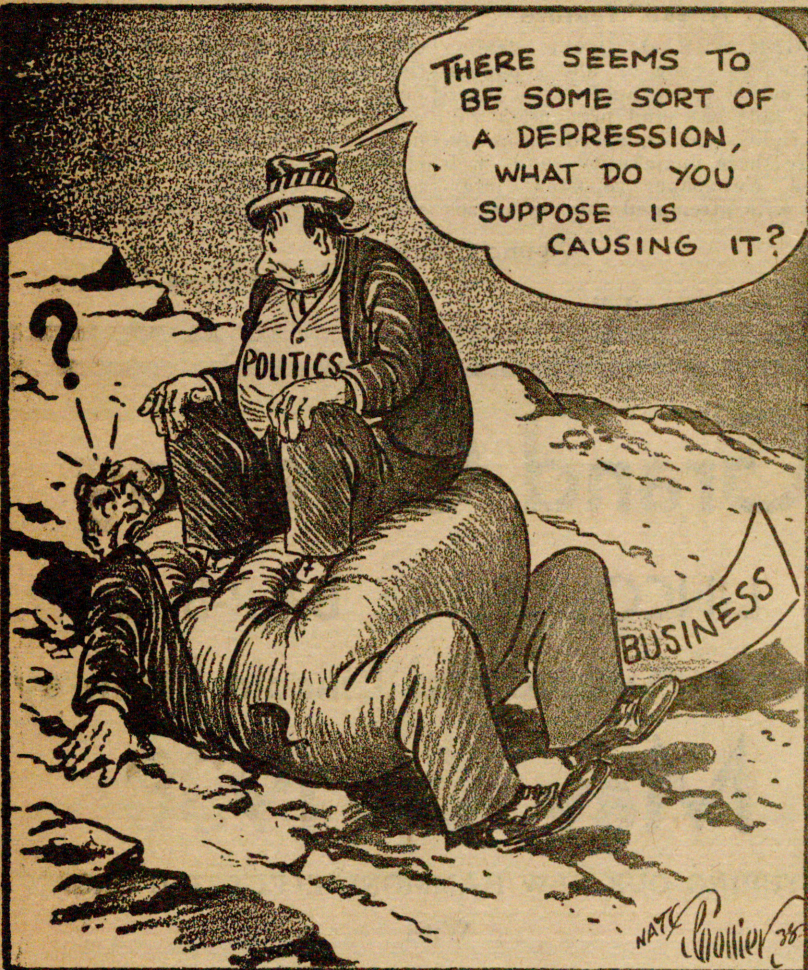

You will find in them a wealth of interesting information on little-known chapters in American history—fact stories more fascinating than fiction. These articles also cover other fields—popular science, sports, industry, the fine arts and literature; in fact, every phase of American interest. This newspaper considers itself fortunate in being able to give its readers such articles as these by one of the leading feature writers of the country today. Tell your friends about them if they haven't seen them yet.

TO SCHOOL CHILDREN:
Teachers find these articles helpful in classes. Some students are making scrapbooks of them. Tell your teacher and your classmates about them!

OUT THE WINDOW!

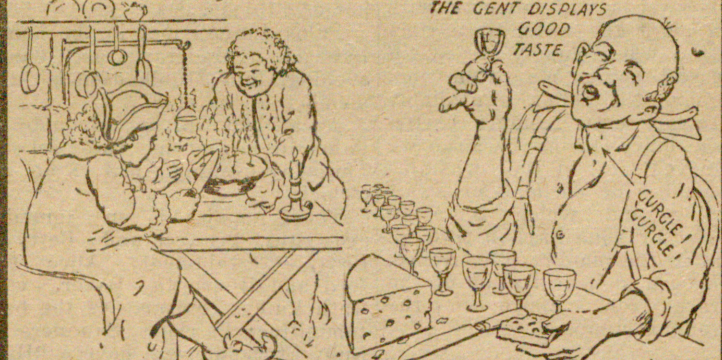

FOOLISH QUESTION NO. 41144

THINGS TO WATCH FOR, A chemically treated package of charcoal and shredded paper, which it is claimed will bring the fire in your furnace to full flame in five minutes...chromium steel "wall paper" for rooms... unbreakable eyeglasses made of plastic material... antiseptic paint to keep walls sterile, made with ethylal which gives off vapor deadly to germs... automatic baseball thrower will put any kind of curve on a ball... bed mounted on pulleys so that it can be raised to ceiling during daytime... a coal dust carburetor which its inventor claims will run an automobile 35 miles on a gallon of dust.

Washington—Most important development of the week in the Capitol was the defeat of the reorganization bill by the House of Representatives. With the House in open revolt it seems likely that the highly controversial wages and hours bill will also be tabled for the present. The administration announced a new plan for an enlarged public works program which will require an expenditure of from two to six billion dollars. It is proposed to finance this part by non-interest bearing loans to local communities which would be callable in 50 years. Despite this feature the national debt will skyrocket well over the 40 billion dollar mark if the plan is approved.

Tests Prove the Power of Food

Demonstrate a Vitamin-Rich Diet Is Vital to Health

By C. HOUSTON GOUDISS

MANKIND owes many things to the animals which have been used as test subjects in laboratories all over the world. As doctors and scientists have waged their war against disease, as they have made great strides forward in the study of foods and nutrition, they have carried on many of their experiments with rats.

The rats pictured here dramatically illustrate the power of food to influence growth. Although these two rats are exactly the same age,

the weight of one is twice that of his brother. Where one animal is puny and underdeveloped, the second is fat and sleek and full of vitality.

What has produced such a difference in weight and general physical well-being? Merely a slight difference in diet. The two rats have lived under identically the same conditions, but the smaller animal on the left has received food lacking in sufficient vitamins, while the other rat has been fed the same diet, reinforced with vitamins.

If a well-balanced food ration is vital to the health of animals, how much more vital it must be for human beings. Surely the lesson is plain to see. If a mother wants her children to thrive she must feed them adequately. The child who is receiving a diet lacking in vitamins has no chance to grow and develop properly. Nor will the adult on a deficient diet attain or maintain optimum health.

EDITOR'S NOTE: To plan a diet wisely, to recognize the foods rich in important food elements, we must learn to utilize the discoveries of science. We must keep abreast of the newer knowledge of nutrition as it is presented by wise, unbiased interpreters such as C. Houston Goudiss, nationally known food authority, who each week offers his "What to Eat and Why" column in this newspaper. In this column Mr. Goudiss translates the latest developments into simple, non-technical language. By following his articles regularly, it is easy to keep in step with the most up-to-date findings of nutritional science.

Business—The unseasonal weather last week in many parts of the country and heavy snowfall in the Middle Western area and Atlantic seaboard had a dampening effect on pre-Easter sales in retail stores. April retail trade generally, however, is expected to show considerable improvement over March. Three important items last week would indicate that business is slowly turning upward. First, shipments of the United Steel Company last month were the largest since November, totaling 575,000 tons; second, sales of new automobiles turned upward for the first time since last July; and third, engineering construction awards for new buildings were the best in March since 1930 and were 32 percent ahead of 1937.

Expert Pottery Forger

French and German museums contain many specimens of that extraordinary forger of pottery, Michael Kauffmann of Rheinzabern, a village mason, who carried his game on for 40 years and invented inscriptions which the pundits are wrangling over to this day.

Progress vs. Politics

By RAYMOND PITCAIRN

National Chairman
Sentinels of the Republic

During the past few weeks various groups of citizens have appeared before Committees of Congress to urge constructive action in the cause of recovery.

They have been asking government to lift its foot from the brakes which slow down progress, re-employment, and our national well-being.

America, they have pointed out, has the resources, the energy, the strength and the intelligence to continue the progress which in a century and a half developed our country from a fledgling republic into one of the greatest nations in history, and created high standards of living for its people.

In these statements they are supported by established facts. They, and the many American workers and earners whom they represent, can show that in the United States we have, in addition to generous natural resources, more automobiles, more telephones, more radios, more railroads than any nation on earth.

They can show that the purchasing power of the American people is greater than the purchasing power of all the millions in Europe or in Asia.

They can add that the American people top the list in facilities for education for all. Throughout the world our nation is acknowledged as the home of religious tolerance and widespread opportunity.

These things, they can show, were not the gifts of office-holders and politicians. They were created and developed by the initiative, the strength and the love of freedom of the people themselves.

With such facts not only evident, but universally acknowledged, the average citizen continues to ask that our progress be allowed to continue, unchecked by the hand of politics, whether it bears gifts or a goad.

Congress, it would seem, is lending a more willing ear to the demands of the people. In several recent instances it has demonstrated a readiness to put their desires above the promises and the pressure of politics.

All Americans will hope that Congressmen continue to consider the demands of the people above the voice of politics, and thus set us again on the road to recovery and re-employment.

Uncommon Americans

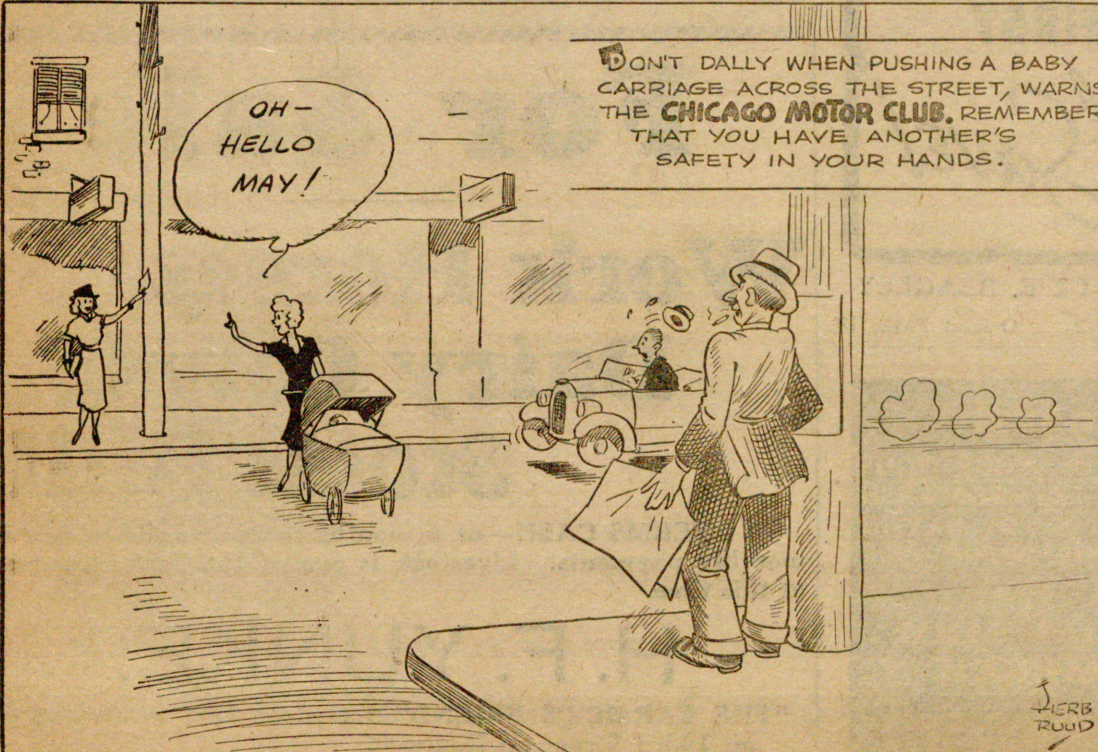

A new series of short articles on unusual personalities in American history... a series you should not miss... a series running regularly in this paper. Fascinating, extraordinary, it is prepared by a leading American feature writer...

ELMO SCOTT
Watson

Fearful of Cholera

Ohio pioneers were so fearful of cholera that many of them would put strong coverings around the coffins of victims to prevent the germs spreading from inside the ground. They covered the coffins with leather, rawhide and other such materials.

"PEDESTRIAN POINTERS" SUGGESTED BY THE CHICAGO MOTOR CLUB

Household Hints

New cover for the easy chair? New color scheme for the bedroom? Wise housewives confronted with such problems will turn to Betty Wells and her "Household Hints" column, a regular feature of this paper.

Here you get the latest information on economical and clever homemaking... reported by one of America's most noted household authorities.

Betty Wells gets her information from two sources: The first, actual experience, and second, a constant weather eye on new developments in the homemaking field. Turn to her "Household Hints" right now!

Quick Action

Most of us when they decide to do a piece of printing don't do it at once. We are well equipped to give prompt service on your work. Furthermore, it will not look like a hurry-up job, since our ability to handle rush work enables us to give it the same careful attention that is given less hurried work.

That's Us

FRANKFORT

Mrs. Herbert Kohlhaas

Mr. and Mrs. Geo. Mishand of Livermore, California, and the latter's mother, Mrs. M. C. Legg of Lockport, spent Wednesday with Mrs. P. J. Reiter at the home of her daughter, Mrs. Arthur Eisenbrandt. Mrs. Mishand is Mrs. Reiter's sister.

Mr. George Haas is convalescing in his home from the illness of erysipilas.

The condition of Mrs. William Wischover, who broke her leg on April 13th while cleaning house, is very favorable. She is a patient in Silver Cross hospital.

Mr. James Borth, who is employed by Raymond Warning as a farm hand, had the misfortune of breaking his arm last week.

Miss Esther Gerhold, who teaches high school at Assumption, Ill., enjoyed Easter vacation with her parents Rev. and Mrs. Gerhold.

Miss Dorothy Elsner, Mr. Clarence Klepper and Mr. Arthur Krusemark, who are students of the University of Illinois spent Easter vacation with their parents.

Mrs. Vernon Hansen made a trip through Michigan and Wisconsin, also stopping at La Crosse for a Easter vacation.

Mr. and Mrs. William Lorenzen gave a family dinner on Sunday, April 17th, in honor of their son Norman, who was confirmed on Palm Sunday.

Mr. and Mrs. John Weitendorf gave a dinner to the Scheel family on Sunday, April 17th in honor of their daughter Arlene who was confirmed on Palm Sunday.

Walter Weitendorf has recovered from the misfortune of having a fractured blood vessel in his foot.

Raymond Warning underwent an emergency operation on Sunday, April 17th, for appendicitis. He is a patient in Silver Cross hospital.

The daughter of Mr. and Mrs. Harold Ulrich was baptized on Sunday, April 17th, in their home by Rev. Schellhase of the Methodist church. The name given was Carol Lu.

The sponsors were Mr. Earl Ulrich, Miss Marie Schuhl, and Miss Georgia Mitchell.

The Ladies' Aid of Evangelical

and Reformed church will have their business meeting on April 28th, at 2:30. The following members are serving a hot dinner any time after 4:30: Mrs. Augusta Weber, Mrs. Elmer Batson, Mrs. George Minger, Mrs. John Schroeder, Mrs. Harvey Spiess, Mrs. Mary Eisenbrandt, Mrs. Carl Barlow, Mrs. Henry Breidert and Mrs. Herbert Nordstrom. In the evening a program consisting of a playlet "Who is the Coward?" and musical numbers will be presented. All are invited to come.

The Frankfort Music Ensemble is sponsoring a bakery sale starting at 2 p. m. in the Mager & Mark store on Saturday, April 30th. In connection a radio will be awarded in the evening.

Mr. and Mrs. Burton Breidert moved into the modernized flat of the Henry Breidert home on Tuesday.

Conservation Week April 17th to 23rd

Illinois' Third Conservation Week has been set by Proclamation of Governor Horner for the week of April 17-23. This event was inaugurated in 1935 and met with state-wide approval and support. Since then, there has been a demand each year for a similar observance.

Selection of dates this year is particularly timely. Beginning on Easter Sunday the full significance of the spring season has been incorporated into Conservation Week and Arbor Day, also set by Proclamation of the Governor, will fall on April 22nd. The purposes of these events are so closely allied that combined observance is considered advantageous.

It has also been pointed out that Conservation Week should be observed before the closing of rural schools, so that programs in its recognition could be arranged throughout the school system of the State.

Conservation has assumed an enlarged role during recent years with a realization of diminished natural resources. It is everyone's business but only in recent years has the public become Conservation-minded.

Schools are adopting the subject as a part of their courses of study and civic organizations are actively supporting all phases of Conservation. Schools and clubs are being urged by Thomas J. Lynch, Acting Director of the Department of Conservation, to formulate programs in recognition of Conservation Week, to focus the attention of all communities upon the principles of Conservation.

In Illinois the State Department of Conservation has jurisdiction over fish, game and forestry matters. Also through its Director's ex-officio membership on the State Sanitary Water Board, the Department takes part in administering the statutes for the abatement of stream pollution, which in itself is a very important phase of Conservation and directly allied with the welfare of fish and game.

Interest in Conservation Week is manifested by the inquiries concerning it received by the Department of Conservation, and by the rapid growth of sportsmen's organizations and their activities. A most successful Conservation Week is expected, in view of the interest already being shown.

Gov. Horner's Floral Contest

For four years the State of Illinois through its Division of Highways has been landscaping its roads to serve the triple purpose of controlling soil erosion, reducing maintenance costs and beautifying the landscape. Thus far, fully a quarter of the State primary system roads approximately 3,000 miles has been so developed. The program which has included the planting of shade and flowering trees, shrubs, and ground cover, has had an appreciable effect in restoring to the Illinois Highway rights of way much of their native attractiveness.

A great part of the enjoyment of the beauty of the country-side as seen from the highways lies in the yards and grounds of the farms and homes facing the highways. As a means of encouraging Illinois farm

residents to supplement the State roadside landscaping program, Gov. Henry Horner has directed the Division of Highways and the Department of Agriculture jointly to institute a Farm Floral Contest with the cooperation of the Illinois Federation of Women's Clubs and the Garden Club of Illinois.

Accordingly, the Illinois State Fair Division of the Department of Agriculture, will award during the State Fair Week in Springfield, Aug. 13 to 21, prizes for the most attractive farm yards and grounds on Illinois State Highways.

There will be two classes of contestants:

Class A — consisting of farm owners or operators on whose grounds landscaping effects were created by themselves, or members of their families (or by former owners or operators).

Class B — consisting of country home or estate owners who had advice, assistance, or supervision by professional landscape architects, or owners whose principal income is not derived from the operation of their farms.

Both classes will be judged to determine county, regional, and State winners. For this purpose the State has been divided into ten regions, formed by grouping the counties as follows:

Region 1. Boone, DeKalb, Kane, DuPage, Kendall, Lake, McHenry, and Will counties.

Region 10. Cook county.

The 101 county judging committees and the 10 regional judging committees will each consist of three judges; one appointed through the State President of the Illinois Federation of Women's Clubs; the second appointed through the State President of the Garden Club of Illinois; and the third selected by the first two appointed members of each of the judging committees.

The State judging committee will be composed of three members: Mrs. E. G. C. Williams, Garden Chairman of the Illinois Federation of Women's Clubs, Mrs. E. E. Byrum, Conservation Chairman of the Illinois Federation of Women's Clubs, and Mrs. Emily M. Spencer, Roadside Beautification Chairman of the Garden Club of Illinois.

Entry blanks are distributed through

the various local organizations comprising the Illinois Federation of Women's Clubs and the Garden Club of Illinois. These also are available at the offices of the various county farm bureaus and other farm organizations. Entry blanks will also be sent on request from the Division of Highways, Springfield.

These entry blanks are in the form of post cards addressed to the Division of Highways Landscape Engineer. Those wishing to enter the contest should fill in these cards and place them in the mail by May 10.

Beginning June 1st, the contestants will be judged by the county committees and the names of each county winners given to the Landscape Engineer by June 22nd.

The Class A winners of each county will be awarded prizes of \$10.00 during State Fair Week. Class B winners will be presented with 9 x 12 inch cast bronze plates, suitable for placing on entrance gateways, inscribed with wording to the effect that these farm grounds were judged the most attractive in the Governor's 1938 Farm Floral Contest.

Beginning July 1st, the county winners will be judged by their respective regional committees, who will select the regional winners. These regional winners names will be given to the Landscape Engineer by July 20th.

The ten regional winners will be judged beginning August 1st by a State Committee which will determine the thirteen State prize winners. Of course, Class A contestants will be awarded the following prizes during State Fair Week:

1st prize \$100.00
2nd prize \$ 50.00
3rd prize \$ 35.00
4th prize \$ 30.00
5th prize \$ 25.00
6th prize \$ 20.00
7th prize \$ 15.00
8th-10th prizes ... \$10.00 each

In addition to the \$100.00 cash prize, the State first prize winner in Class A will also receive an appropriately inscribed 12x18 inch bronze plate.

The first, second, and third State prize winners in Class B will be awarded bronze plates similar to the one for Class A.

Photographs of all winning farm grounds will be exhibited at the State Fair. The State prize winning grounds for both classes will be photographed by the professional photographer of the State Division of Highways, while photographs of regional and county prize winning grounds will be secured by the Division of Highways District Landscape Engineers.

Regional and State judging committees will be furnished transportation by the Division of Highways, while County judging committees will be asked to furnish their own transportation, as far as possible.

Class contestants will be judged according to the following card:

1. General Impression — Attractiveness to the eye of the passing motorist, accentuated by the display of flower masses; indication of feeling for orderliness and love of beauty

on the part of the occupants . . . 15 points.

2. Flowers—Interest, determined by their value as a display of color; condition; arrangement . . . 25 points.

3. Buildings—State of repair, including painting . . . 15 points.

4. Fences, Gates, and Entrance Ways — State of repair, painting . . . 10 points.

5. Trees and Shrubs — Interest and value, determined by variety, health and shape . . . 10 points.

6. Lawns — Vigor and likelihood of greenness during the normal seasons; care in trimming and edging . . . 5 points.

7. Abutting Highway Right of Way — Evidence of co-operation with the Division of Highways in making improvements, including planting as provided for in the general plan of the Division of Highways; condition of the ditch; establishment of ground cover; attractiveness of mail box and the condition of turn-out to mail box; surface and repair of entrance drive; freedom from obstructions to safe sight distance of the highway in both directions from the entrance drive . . . 10 points.

8. Service Yard — Orderliness and absence of implements left to weather; condition of surface and passability during wet weather . . . 5 points.

9. Orchards— Small fruit plantings and kitchen garden. Orderliness of arrangement and condition of plants . . . 5 points.

Class B contestants will be judged according to the following card:

1. Ground Plan or Design — Suitability of the type of development to the style of the building . . . 15 points.

2. Proportion — Balance of the parts; scale in composition . . . 15 points.

3. Lawn Areas— Interest, value, and upkeep . . . 10 points.

4. Trees, Shrubs, and Woody Vines — Interest, value, and condition; plant arrangement, grouping, harmony of form and color; related and contrasting tones, masses, and values . . . 20 points.

5. Flowers: Perennials, Annuals, Bulbs, and Bedding Plants — Condition; plant arrangement, grouping, color; succession of bloom, year-round interest . . . 15 points.

6. Originality — Original ideas and personal qualities . . . 10 points.

7. General Cultural Perfection. Including Condition — Qualities, showing good landscape practice and care . . . 15 points.

In judging both classes, the appearance of the grounds and that part of the highway in front of the grounds shall be considered from the point of view of the passing motorist. The points to be judged are neatness and attractiveness of appearance as viewed from the highway.

Flight of Migrating Birds

Evidence adduced by the United States Biological survey shows that the greater part of migration takes place below 3,000 feet above the earth's surface, much of it below 1,000 feet, and that birds prefer to fly below the level of the clouds.

Lowest Cost in History
PLUS
Generous Trade-in Allowance

... MAKES THE NEW 1938
SERVEL ELECTROLUX
AN OUTSTANDING REFRIGERATOR BARGAIN!

Liberal Allowance

—on your old icebox or mechanical refrigerator. (Depending on cost of new Electrolux).

SMALL DOWN PAYMENT
As long as 30 months to pay balance on your Gas Service bill.

Here's Why
GAS Refrigeration Saves
You Money Year After Year

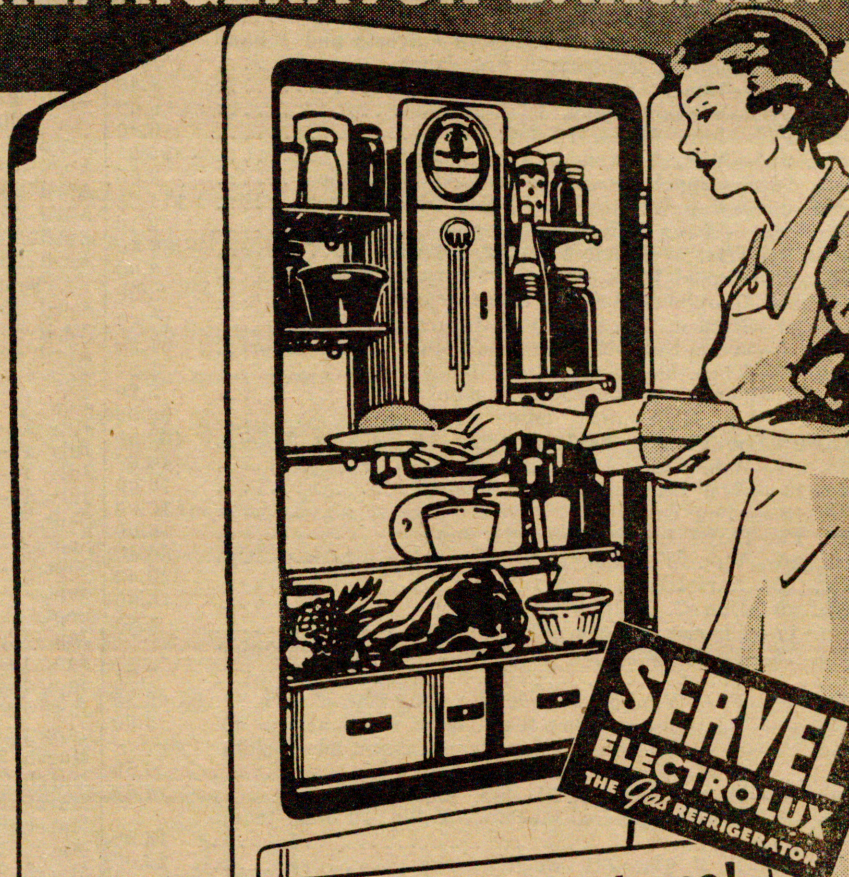

● Electrolux, the gas refrigerator, saves because it's different. The little freezing mechanism which makes cold with the tiny blue "thrift flame" is the only freezing mechanism which has no moving parts. No moving parts means no parts to wear—giving you longer life for your refrigerator . . . and low upkeep cost, for there are no expensive replacements. It also costs less to operate, because efficiency is held at the same high level, allowing the "thrift flame" to scrimp on fuel, year after year. Then, too, you get permanent *silence*—parts that do not move, do not make a noise.

See this beautiful new Electrolux today!

Come in and see the refrigerator that saves—marked at a lower price than ever before—with a generous trade-in allowance and more sensational new convenience features. See the extra roominess, the compact arrangement, the features that cut down on work—safeguard family health with dependable food-keeping. See the thrilling beauty it will bring into your kitchen.

OTHER DEALERS ARE ALSO SHOWING THE

PUBLIC SERVICE COMPANY
OF NORTHERN ILLINOIS

See These Great NEW Features!

1. New Tray Release. A gentle lift of the hand on the new tray release frees the tray without a struggle.
2. Stainless Steel Cube Release. Flexible cube release makes it easy to get one cube or the entire trayful at once. No holding under tap—you get 20% more ice!
3. New Illuminated Temperature Dial. In plain view every time the door is opened. The indicator reports the temperature in the food compartment, giving assurance that the constant cold of Electrolux is protecting your food every minute.
4. New Adjustable Cold Storage Tray. This tray is adjustable to two levels in the coldest part of the food storage compartment. It is ideal for thoroughly chilling meats and other foods—will accommodate bottles and bulkier roasts.
5. Push or Pull Door Opener. When hands are full—just give this latch a slight nudge—the door opens instantly.

Annual Reports Town of Frankfort
Will County, Illinois

RELIEF FUND

STATE OF ILLINOIS, ss. TOWN OF FRANKFORT.
County of Will,

The following is a statement by William Kampe, Supervisor of the town of Frankfort, in the County of Will and State aforesaid, of the amount of public funds received and expended by him during the fiscal year just closed, ending on the 29th day of March, 1938, showing the amount of public funds on hand at the commencement of said fiscal year, the amount of public funds received and from what sources received, the amount of public funds expended and for what purposes expended, during said fiscal year, ending as aforesaid.

The said William Kampe, being duly sworn, doth depose and say that the following statement by him subscribed is a correct statement of the amount of public funds on hand at the commencement of the fiscal year above stated, the amount of public funds received and the sources from which received, and the amount expended, and purposes for which expended, as set forth in said statement.

WILLIAM KAMPE.

Subscribed and sworn to before me, this 29th day of March, 1938.
J. M. CLARK, Justice of the Peace.

ORLAND PARK

The state highway department is laying a string of 24 inch concrete sewer tile on the south side of 143rd street west of Keane avenue to drain the water from the low lands near the intersection of Keane avenue and 143rd street along the Harry Daniels property. Mr. Daniels had a great deal of trouble for some time with high waters which ran into the basement of tavern often times flooded it to a depth of four or five feet deep. About a year ago the Orland Park Fire Department pumped the water out of the flooded basement. The new sewer will drain off the water from the Daniels property and alongside Keane avenue.

Work on the new home of Mayor Wm. Kollman is progressing nicely. Chas. Hahelein is engaged in the construction of a garage in Blue Island.

Work on tearing up the pavement on Keane avenue north of 159th street is well underway. The dips in the road torn up will be filled in and a new pavement laid.

Keane ave. traffic from the south is routed down 159th street to Wolf road thence north to 143rd street thence east on 143rd street to Keane avenue east of Orland Park.

A check of the amount of traffic going under the Wabash viaduct was made Monday by a representative of the Commerce Commission. The viaduct in question is to be replaced by a new one. Last Friday two representatives from the Wabash railroad, the Commerce Commission and the village board met to consider the matter. The meeting was held over to Thursday of this week for further consideration of the proposed improvement.

The village board will meet in semi-monthly session next Monday night.

Franklin Loebe who recently underwent an operation in the Borgess hospital in Kalamazoo, Michigan is convalescing nicely.

Dr. W. R. Schussler has gone on a trip to Brownsville, Texas. On the return trip he will be accompanied by Mrs. Schussler who has been spending the winter in Brownsville.

ORLAND SCHOOL NEWS

The first soft ball game of the season will be played at Forest Ridge by the grade schools next Tuesday. The following Tuesday the Stickney grade school team will play at Orland Park, game starting at 3:15 p. m. All ball fans are invited to attend. Be sure to come out.

The annual grade school spelling contests in Orland township schools got under way Wednesday. The winners will take part in the county spelling champion contest in County Supt. of Schools Noble Puffer's office April 30th. The Misses McMahon and McLaughry had charge of the spelling contest in the Orland Park school Wednesday.

MOKENA SCHOOL NEWS

Primary Room—The room is stricken again, this time with measles—taking about a third of the attendance.

The children made Easter baskets for chocolate eggs, and decorated Easter eggs to represent animals.

Intermediate News—The pupils in this room enjoyed making Easter baskets and decorating eggs last week. The fourth grade had an interesting English lesson composing poems about a pet. The following was written by Wm. Steen, Jr.

NOT FOR SALE

I have a dog and he's not for sale. He's big and brown and has a bushy tail.

I get the comb and comb his hair. Saying then, "My what a pretty Duke you have there."

Sometimes he follows me to school,

And that you know is against the rule.

When I am naughty and Mom gets the plank Duke loudly barks and won't let her spank.

These are the reasons he's not for sale.

And I won't let anyone chop off his bushy tail.

Junior High—We were very sorry to lose Betty Tavis from our room.

High school—The students are working hard on the play which will be presented next Friday night.

The Mokena school enjoyed a short vacation from Friday of last week till Wednesday of this week. Everyone was happy to have a few days rest to get rid of 'spring fever'.

NEW LENOX

Dolores Walsh

Mrs. Stephen Sargent was elected president of the Woman's Club at the April meeting held Wednesday afternoon in the Doig-Papke home. Others officers are: Mrs. Amos Bruns, vice president; Mrs. Wm. Drake, secretary; Mrs. Wm. Kay, treasurer. The annual treasurer's report was given and the librarian, Mrs. O. V. Rowe announced the spring tri annual meeting on April 21 in Elwood.

On behalf of the club, Mrs. Raymond Osmus presented Mrs. W. W. Sine, the retiring president, with a plant. Mrs. Sine thanked the members for their co-operation during the past three years.

Mrs. Rowe had charge of the program which included a talk on spring flowers and garden planning, presented by Mrs. Geo. Morris; an article, "The Seeing Eye Dog" was read by Mrs. Louis Wilson and Mrs. Rowe showed the vase of the month, three varieties of daffodils. Mrs. Earl Wenzel reviewed the book, "How We Became Americans," and Mrs. Wilson read an article, "Half Isn't Enough". The May hostesses will be Mesdames, A. R. Kercheval, James Gurley and Earl Wenzel and the program will be in charge of Mrs. Edw. Mangun, Mrs. Wm. Kay and Dr. J. Holt. Refreshments were served by the hostess assisted by Mrs. Arthur Henderickson.

Mrs. Louis Pelkey entertained the Woman's Guild of the Episcopal church Thursday afternoon.

A daughter was born recently to Mr. and Mrs. Paul Sturek of Chicago, former residents of New Lenox.

Miss Elizabeth Francis, a senior at Iowa University and F. C. Francis are spending their spring vacation in their homes here.

Guests in the John Cruise Jr., Sunday were: Mr. and Mrs. Will O'Hara and daughter, Miss Irene Leff, Leona and Geo. Reed, Raymond Cerven, Adeline Reed and Harold Deitz all of Chicago.

Mr. and Mrs. Joseph Walsh and Mr. and Mrs. A. W. Walsh were guests Sunday in the Thomas May home in Channahon.

Mr. and Mrs. Wilbur Rapson have moved into the A. R. Kercheval home, on Maple street.

The Maple Street Arbor of Glean-

ers will give a dance in Colonial hall May 6th.

The following were dinner guests in the Chas. Reeser home Sunday: Mr. and Mrs. Elmer Benson, Mr. and Mrs. Fred Knudson and daughter, Mr. and Mrs. Ernest Munson and family, Mr. and Mrs. Howard Marti and family, Chas. Erickson and family and Virginia Brown.

Geo. Woodcock is ill in his home.

Mr. and Mrs. James Tauber and daughter spent Sunday with Mrs. F. Koncel in Chicago.

Mr. and Mrs. Ray Brown and family spent Sunday in the Sydney Batson home in Joliet.

The Leo Waldvogel, Herb. Sennings and Wm. Collatz homes are quarantined for measles.

Mrs. Anna Mattes and son Walter spent Sunday in Geo. Woodcock home.

Mr. and Mrs. Russell Sass and family have moved here from Louisiana.

Mrs. Mae Corp spent a week here in the Henry Miller home.

Douglas Brown is spending this week with his grandparents in Joliet. Dewey Ruettiger of Memphis, Tenn., spent the week end here with his parents.

Mr. and Mrs. Roy Devore and Mr. and Mrs. R. Swanson of Chicago were guests Sunday in the Arvid Swanson home.

The Band Parents As., officers held a special meeting Monday night.

The Woman's Club of St. Jude's church met Wednesday night.

Mrs. Chas. Ellis returned Monday from a trip to Denver, Colo.

Dinner guests in the W. Rhinhome Tuesday evening were: Mr. and Mrs. Chas. Ellis and Mr. and Mrs. George Hunt.

Mr. and Mrs. Howard Apres and sons spent the week end in Decatur.

The Frankfort-New Lenox 4-H Club met Thursday night in the F. Francis home. Project talks were given by Marvin Capple on "Hybrid Corn"; Norvell Strassenberg, "Soil Erosion and its Prevention"; Fred Francis Jr. told about "This Year in College"; Nick Heiman played a solo on his bass horn. Clarence and Everett Henry joined the club.

Plans were made for Stunt Nite to be held in Manhattan May 28. Dorothy Eisenbrandt was appointed chairman. The next meeting will be Tuesday night May 17 in the Summit Hill school.

Mrs. Walter Rhinhardt entertained the Entre Nous club Wednesday afternoon. Bunco was played and prizes given to Mesdames, W. McIntyre, Walter Baer and Ellis O'Daniel.

The New Lenox Girls 4-H Club met April 16 with Mrs. W. E. Allen. Election of officers was held with the results of: President, Lois Sargent; vice president, Mary Ann Allen; Sec. and Treas., Doris Lawler recreational chairman Irene Gilkeron and reporter Bette Lou McCann.

Mr. and Mrs. Thomas Carey were dinner guests Sunday in the Chas. Johnson home in Manhattan.

Mr. and Mrs. R. Mangun were dinner guests Friday in the Chas. Yuill, Jr., home in Hamilton Park.

New Lenox Weekly Livestock Market

SAT., APRIL 23rd, 1938, AND EVERY SAT. THEREAFTER
At the J. C. Brisbane farm, located 1 1/2 miles east of New Lenox, Illinois, on Route U. S. 30, Lincoln Highway.

Sale to commence at 11:00 a. m. We have a large consignment of Livestock for Saturday, with plenty of good buyers on hand.

Be sure to bring your veal calves, hogs, cattle, and horses.
C. B. DRAKE, Auctioneer.
CHAS. ERICKSON, Sales Manager.

THANK YOU!

Many thanks to those who voted for me in the recent Primary. I assure you that if elected I shall continue to vote in the interests of the people of this district, and to the taxpayers you may count on me to continue to oppose all useless commissions and investigations regardless of partisan or political considerations.

Lottie Holman O'Neill

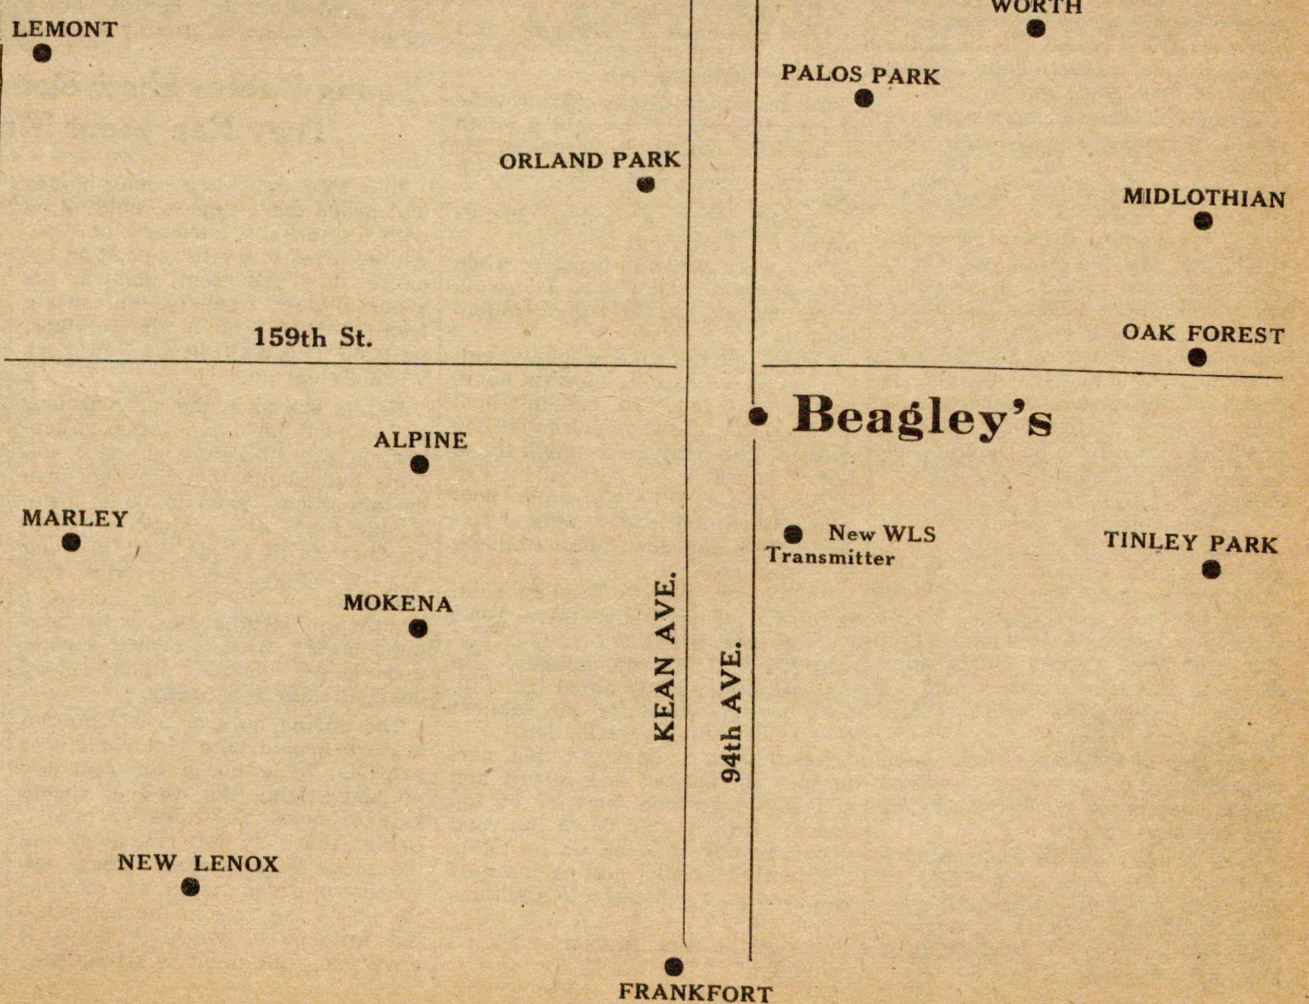

THANK YOU!

This is to convey to all my friends in Mokena, Frankfort and Homer townships the sincere appreciation which I feel for the splendid majority vote which you gave me at the Primary Election, April 12th.

WNU SERVICE

SYNOPSIS

Sarah Lynn Dana, youngest of the Dana women of Danavale, Calif., chafes at the well-ordered life approved by her mother, Adelaide, who is trying to marry her to Duncan Van Doren, Detroit society youth. Great-Granny Dana, covered-wagon pioneer, and community matriarch, recognizes in the girl the restless adventurousness of the "dark Dana," a trait shared by her and Cousin Sally Ann Dana, traveler and author, and pleads with Sally Ann to take the girl abroad. Uncle Lynn, wheelchair invalid, adds his plea to Sally Ann to save Sarah Lynn, as does the girl's young brother, Bill. Another plea comes from Miss Pennington, "Penny," adoring governess of the girl, saying she is unhappy and misunderstood. At a family dinner party, Sally Ann first hears of Keaton Dana's ultra-modern wife, Ardine, who runs a roadhouse called the Stewed Prune, and is trying to wangle a fight with Gunnar Thorwald, Norwegian ace, famous for his refusal to fly women, through their mutual friend, Jim Allison. Gunnar Thorwald arrives with Jim Allison, and Sarah Lynn is attracted to him. Duncan invites her to the Stewed Prune. Sarah Lynn refuses to drink anything but ginger ale, which Ardine herself serves. Cousin Mary Dana Webster tells Sarah she suspects Ardine and her friends of framing on Gunnar, and Sarah Lynn, in an increasing stupor, decides to warn him.

CHAPTER IV—Continued

"The customer is always right," his helpmate reminded him.

"Say, I'd rather lose the account," he moaned.

Ardine came back with the cool bottle and the tall amber glass. "Here, baby! This will brush out the cobwebs." Then she looked at her sharply. "Listen, darling—did you have a couple of drinks before you got here?"

Sarah Lynn said: "No!" explosively.

"You know she never touches—" Mary Webster began indignantly.

"Of course that's why I'm wondering. I've never seen her this way. I thought maybe Duncan had a flask, and that while they were driving around—Oh, well—never mind." She looked at Ned Webster. "The rising realtor pretty low?"

His wife nodded.

"Well, look," the hostess said quickly, "why don't you take him home and we'll deliver the customer at your door in the rosy dawn?"

Mr. Webster made sounds of faint pleasure.

"More people are coming, and he has so large a displacement, I'd rather have him do his sleeping in his own bed, if you don't mind."

"All right, soldier the pardon has come," his wife prodded him. "Thanks a million, Ardine."

Sarah Lynn, watching their exit, yawned widely again. "I can't imagine what makes me so sleepy," she apologized, drinking thirstily.

The other regarded her shrewdly. "Well, if you really haven't had anything"—Sarah Lynn was shaking her head violently—"it must be just this foul air. Shut your eyes and doze, baby. Duncan's very, very busy proving he isn't afraid of his nearly mother-in-law." She gave her a pat and went away.

Sarah Lynn was thankful to be left alone. Except that she must stay awake to warn Gunnar Thorwald she would be thankful for this drowsiness.

"But I won't go to sleep," she told herself. "I'm going to sit up straight and watch for Gunnar Thorwald and warn him away. It would be too horrible . . . one of their silly tricks . . ."

Suddenly, silently, the flier stood on the threshold, looking into the Stewed Prune. He was very tall, and he wore an odd foreign aviator's suit of creamy leather and a stern helmet which gave to his lean young countenance an austere and classic expression.

He was angry. Jim Allison had missed connections with him in some way, and it was long past the hour set for the start of their night-flight to Los Angeles.

He saw Ardine Dana across the jammed, smoke-blurred room. She would know. He took a forward step and halted at a queer, choked cry.

Not far away, alone at a small table, he saw the thin, dark girl he had noticed at the fine old country home where Allison had taken him early that evening to see the writing woman whom he had met in Vienna. She had not seemed, on that first impression, the sort to be found here; but after the metamorphosis of Jim Allison he would never be surprised again at these Americans.

She was staring at him. She made the low, strangled cry again, and got unsteadily to her feet. There were scarlet patches on her cheekbones and her eyes were those of a sleep-walker. She pointed a thin finger at him, holding to the edge of the table with her other hand.

"Go away!" she said thickly.

"Don't come in here!"

The face of the young Norwegian, returning her scrutiny, seemed bleakly composed of narrowed eyes and compressed lips.

"Fly away!" Sarah Lynn exhorted him. "Fly away in the night!"

Then her face contracted swiftly into a wistful semblance of nursery glee. She chanted: "Ladybug, ladybug, fly away home!"

She let go of the table in order to wave both hands, and instantly her knees buckled under her, and she sat down upon the floor, passed groping fingers over her eyes, fell forward on her face, and slept.

It was the major thrill in the existence of the Stewed Prune. "Not Sarah Lynn?" they gasped. "In person! Simply blotto!"

Duncan Van Doren reproached her heavily. "Oh, no! You wouldn't have a drink when I asked you. Oh, no!"

"Oh, Duncan, hush, before I slap you down!" Ardine snapped at him, taking competent charge. The girl, one thin hand trailing, was rushed to the dressing room, and the hostess turned to the flier. "Gunnar, I'm sunk, that this had to happen. The poor baby—it's the first time she ever—"

He cut coldly into her speech. "I seek Jim Allison."

"Oh, yes, of course! He telephoned—he was detained, but he

"Well—Lord, I guess so!" Reedley said. Beads of sweat stood on his face. "Boy! What a night!"

"And what a day is coming!" someone in the flier's car contributed. "Say, Jim, those doors don't fly open—or—or—anything, do they?"

"No," Allison said shortly.

"Well—better beat it back to the Prune and rehearse our parts with Ardine."

Sarah Lynn said to herself: "I can't possibly sleep with the music beating and pounding, but I don't want to wake up, because I can pretend I'm flying . . ."

Her head ached hideously and her mouth was dry. But the air in her nostrils now was sharp and sweet and cold, and she was shivering.

"I'm pretending so hard that I'm actually cold!" she exulted. "But I won't open my eyes, because Duncan will think I'm asleep, and let

a head in a sternly classic helmet.

Sarah Lynn heard her own voice in a strangled whisper—

"Am I even pretending—him?"

Gunnar Thorwald, Norwegian ace, was flying in a cold rage. He was hurt, disappointed, deeply disgusted. Jim Allison had failed him utterly, and it was a blow, because he was young enough, in spite of his astonishing exploits, to take himself and his career with great seriousness.

He had come to America very earnestly, pledged to study and learn, to take home all he could gather from the nation a-wing, and he had counted confidently on Jim Allison.

"I wouldn't think of asking you to break your rule about never taking women up," the American flier had explained, "under ordinary circumstances, but in this case, if you could possibly make an exception I'd appreciate it no end. You see, the fact is, Ardine—and of course her husband, too—awfully decent chap, Keaton Dana, rather heavy, perhaps, but a prince"—he added hastily under the bleak young gaze—"are very special friends of mine, and she's set her heart on going up for a spin with you."

"I am sorry," the yellow-haired youth said civilly.

"Makes it pretty awkward for me. I dare say I—well, I strutted a bit about what pals we are, and I'm afraid I let Ardine infer that I could fix it up for her."

"I am sorry," Gunnar said again.

"I take no women in my ship." He might well have expanded his pronouncement to say that he took no women anywhere. Sisterless, cousinless, girl-friendless, rigidly reared by a stern grandmother, he had pledged her and himself to keep his mind wholly upon his work until his career was well established.

The night was clear and calm with excellent visibility his hop to Los Angeles would be without excitement.

He came swiftly out of his musings as the nose of the plane dropped, the whir of the motor increased and they leaned toward a downward pitch. He pulled on the stick to regain normal position, wondering what freak of air currents caused the small disturbance. He was aware of a slight jar. Had he, perhaps, struck a high-flying night bird?

He was immediately in level flight again, eased off on the joy stick and began to re-establish the course which had been briefly abandoned, but directly he released his pressure the nose dropped a second time.

There was a jar again, more perceptible this time, and he turned his head to look back through his ship, and found his vision blocked. Incredibly, out of all reason, someone was standing behind him.

His mind refused to accept it. The thing was impossible. It was the figure of a woman!

Then young Gunnar Thorwald, Norwegian ace, experienced an anger the like of which he had never known in all his years of living. It was the sort of berserk rage his ancestors knew, tricked by a wily foe, and which they eased with sudden blood. Jim Allison had made mockery of his rule. Jim Allison had flouted him—his friend—to please the whim of his light-o'-love made a fool of him in the eyes of the tipsy wasters at a tawdry roadhouse. His teeth ground together and his breath came quickly.

The woman lurched forward and caught at his shoulder to steady herself, bent closer to speak above the roar. Their cold cheeks touched.

Young Babies Show Remarkable Strength; They Represent Man in His Arboreal Days

It is said that very young babies will grasp one's fingers, holding on with remarkable strength so they can be lifted to a sitting position because they represent man in his arboreal days when he still swung from limb to limb in the treetsops, writes J. Otis Swift in the New York World-Telegram.

Habits stored in the subconscious and handed down generation to generation are so strong in men, animals and plants that they perform certain things, even in their sleep. Beside roads and pasture paths, in vacant lots of towns, and growing on city dumps, the bare, sere stiff skeletons of cockle-bur, clot-bur Xanthium strumarium, with summer leaves broad-ovate, mostly three-lobed dentate, stand asleep dead, lifeless apparently.

The oblong burs or seed containers are armed with rigid uncinates prickles, little hooks for reaching up and seizing the wool of sheep, hair of dogs, stockings of human beings, that they may ride away and the seeds be scattered. These adventurous rides begin as soon as the seeds are ripe in the autumn—by millions of years of doing it have made the habit so strong they

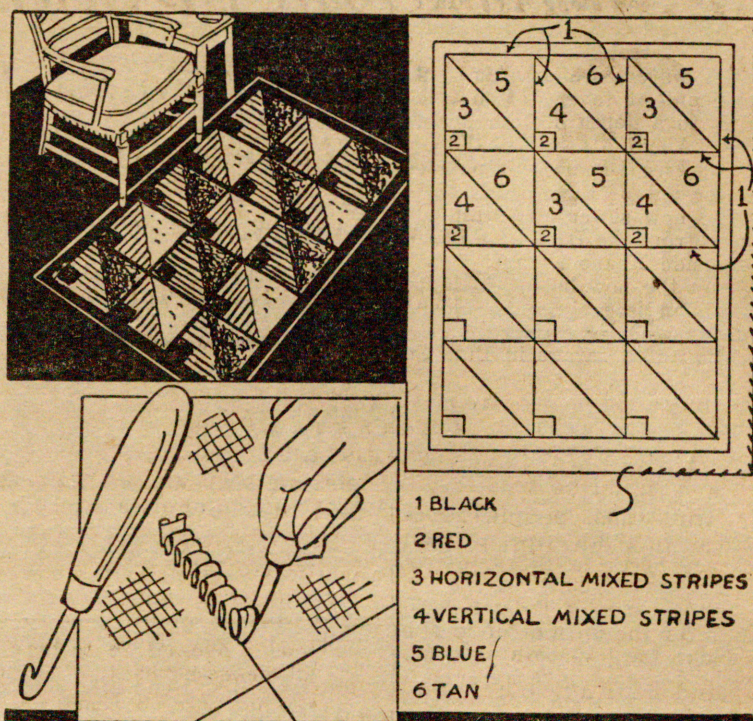

do it even in midwinter when the stalks are dead—like the grasping hand of a miser which reaches out for gold even after the soul has gone where gold is not a medium of exchange. In case of the cockle-bur weed it is a worthy thing, this instinct strong in death, for it teaches the weak-hearted that there is terrible earnestness in Life's determination to persist on earth. Though the word xanthium is from the Greek for yellow—the plant once used to make that dye—the scratchy burs are not "yellow" in spirit—they are brave men in hibernation or death.

Walks on Sea Bottom

Those who have made their livelihood by snaring the octopus in the blue Mediterranean say that it walks on its eight arms on the bottom of the sea, looking for shell fish and other crustaceous forms of marine life. It usually is found in water that is comparatively shallow. When relaxed, its arms float, looking not unlike waving branches of some form of marine vegetation. There are 140 varieties found well into the temperate zone. Along the Atlantic coast of America they are found as far north as Cape Cod.

HOW TO SEW

by Ruth Wyeth Spears

Hook an Old Fashioned Rag Rug

OF ALL rag rugs the hooked type is the most fascinating and economical. A rag rug, such as may be purchased in notion and fancywork departments, and burlap a little larger than your finished rug are the essentials. Most rug hookers also use a frame of slats bolted together at the corners. They stretch the burlap over the frame and tack it.

Some like a pretty large stationary frame. Others use a small one and many hooked rugs are made without any frame at all.

Here is a quaint old rug pattern that you may mark off on your burlap with a yardstick and pencil. The numbers indicate the colors used for the original rug—now more than a hundred years old. The finished rug measures 26 by 34 inches. Allow two inches at all edges for hems. Overcast the edges, then mark the solid one-inch border just inside the hem allowance; then the large eight-inch squares; then the small two-inch squares; then draw the diagonal lines across the large squares as shown. Use wool rags if possible and cut the strips not wider than one-half inch. Hold the strip against the wrong side of the burlap and pull loops of it through to the right side with the hook as shown. Short strips are as useful as long. Just pull the ends through and clip them.

If you are planning slip covers, curtains, or doing other Spring sewing for the home, you will want a copy of Mrs. Spears' book,

How the "Well-Dressed" Furniture Should Appear

This season—and every season—furniture should be kept fresh and gleaming! The home-maker owes it to her furniture—and the appearance of her home. Before it leaves the shop of the furniture dealer, before it is sold—good furniture is kept polished! The dealer continually gives it a "polish service," to maintain its rich appearance—keep the wood "alive!" He, who is an authority, regularly uses a good oil polish (the best is non-greasy, because it has a fine, light-oil base). He knows the importance of this—for selling furniture is his business—and on his shop floor, every piece of fine wood must be kept at its lustrous best! He knows, too, how vital it is to the finish, the very pores of the wood, to frequently apply a quality oil polish on the various suites and fine pieces! The effect of its frequent use on furniture is two-fold: It prevents drying-out and cracking—and it brings to the furniture a deep, lasting high-tone—that suffuses the wood, brings out all the natural beauty of the grain. All woodwork and furniture will remain "well-dressed," decorative, sparkling—if cared for periodically with a reputable light-oil polish!

SEWING, for the Home Decorator. Forty-eight pages of practical working directions, with complete illustrations. A dollar saving book for every homemaker. Send name and address, enclosing 25 cents (coins preferred) to Mrs. Spears, 210 S. Desplaines St., Chicago, Ill.

Spray Roses Frequently

"I find that there is one simple point in aphid control that is overlooked by a majority of rose growers," says Melvin E. Wyandt, rose specialist of Painesville, Ohio. "It is simply that they should spray often. Now don't misunderstand me. Practically all rose growers know that they must spray with a good insecticide to control aphids, but they do not realize that aphids multiply rapidly."

An effective spray for aphid control is made by mixing one to two teaspoonsful of nicotine sulphate in a gallon of water and adding a little dissolved laundry soap. Nicotine sulphate is a poison which kills by contact—the method necessary with sucking insects such as aphids—and in addition, being volatile, it gives off fumes which also kill, making it doubly effective.

WHAT to EAT and WHY

C. Houston Goudiss Discusses

TEETH--Your Passport to Good Health--and Tells How You Can Avoid the Tragedy of Dental Decay

By C. HOUSTON GOUDISS

8 East 39th Street, New York.

A SCIENTIST, who was also a wit, once remarked that you must be true to your teeth or they will be false to you. That most people do not heed this advice is evidenced by the fact that almost 100 per cent of the adult population is affected by some form of oral disease, and from 90 to 97 per cent of all school children have decayed teeth.

As there is a close relationship between healthy teeth and healthy bodies, and conversely, between decayed teeth and sickly bodies, it is easy to understand why science views this appalling situation with the greatest alarm—and why such an eminent authority as Professor Ernest A. Hooton of Harvard University warns that "unless steps are taken to discover preventives of tooth infection, and correctives of dental deformation, the course of human evolution will lead downward to extinction."

Health and Happiness Depend on Sound Teeth

That is a strong statement, but it is not an exaggeration, for it would be difficult to over-estimate the influence of the teeth upon human health and happiness.

Do you wonder how teeth can affect happiness? Consider, then, that a pretty face depends, first upon the position of the mouth when the lips are closed, and second, upon the appearance of the teeth when the lips are parted. You cannot have a lovely mouth when the lips close over crooked front teeth; you cannot have an attractive smile if the teeth are dull.

And when gums recede, and loosened teeth are forced out of their natural position, the position of the lips is likewise changed—with the result that the lower part of the face is disfigured.

Surely this is tragedy enough. But the effect of decayed teeth upon health is of far greater significance.

Dental Decay Does Extensive Damage

A decayed tooth is a poison factory, distributing its noxious product to every part of the body. In the body, that poison attacks and centers in the weakest spot.

It may lead to neuritis, rheumatic ailments, dyspepsia, or even duodenal ulcers. It may be a contributing cause of heart disease.

In view of such extensive damage, it is easy to understand why a prominent medical authority has declared that if the teeth were given proper care, so that dental decay became rare, instead of al-

most universal, more than half of all sickness would be eliminated.

Mothers Are to Blame For Children's Bad Teeth

It has been estimated that the temporary, or "baby teeth" of children come through the gums practically perfect in 98 per cent of all children. Yet, statistics show that by the time they reach the first grade, 90 per cent of the children, both from wealthy homes and from homes where money is scarce, have bad teeth; one-third have abscessed conditions in their mouths, and every fourth or fifth child does not have proper masticating surfaces.

If this disgraceful state of affairs is allowed to continue, the blame must be laid squarely at the doors of the nation's mothers.

Formerly it was thought that oral hygiene alone would prevent tooth decay. But though the importance of thoroughly cleansing the teeth is recognized today as never before, nutritional scientists have discovered that correct diet, plus mouth hygiene, is the real key to dental health.

Diet and Its Relation To Dental Disease

The teeth are living tissues, which require proper nourishment just as much as any other part of the body.

Every food element required for a healthy body plays its part in building healthy teeth. But special emphasis must be placed upon providing adequate amounts of calcium, phosphorus, and three vitamins, A, C and D.

Teeth Are Actually Formed Before Birth

These substances must be supplied before birth and throughout life.

Although teeth do not appear in a baby's mouth until some months after it is born, they are actually formed before birth.

It is during this period, therefore, that proper dieting should begin. The teeth are constructed of the same materials as the bones, chiefly calcium and phosphorus, and if the diet of the prospective mother is not adequate, these building materials are withdrawn from her own teeth and bones.

The old idea that mothers must sacrifice "a tooth for every child" arose because expectant mothers did not realize the importance of taking extra amounts of calcium, which is obtained from milk, cheese, dried peas and beans, green leafy vegetables and many nuts; phosphorus, which is abundant in egg yolk, cheese, whole grain cereals, dried legumes and milk; and vitamin D, which is supplied by fish-liver oils; irradiated foods, or those enriched with vitamin D concentrates; and egg yolk.

It has been proved experimentally that when vitamin A is withheld, the teeth begin to deteriorate, and become chalky, white and brittle.

Vitamin C is so closely related to the health of teeth and gums, that when it is lacking, profound changes occur, including swelling and bleeding of the gums and loosening of the teeth.

Four Important Rules For Dental Health

The prevention of dental decay and the preservation of sound teeth and healthy gums is founded on a four-point program:

First, a well-balanced diet con-

Have You a Question?

Ask C. Houston Goudiss

C. Houston Goudiss has put at the disposal of readers of this newspaper all the facilities of his famous Experimental Kitchen Laboratory in New York City. He will gladly answer questions concerning foods, diet, nutrition, and their relation to health. You are also invited to consult him in matters of personal hygiene. It's not necessary to write a letter unless you desire, for postcard inquiries will receive the same careful attention. Address him at 6 East Thirty-ninth Street, New York City.

taining an abundance of calcium, phosphorus and vitamins A, C and D.

Second, frequent and thorough brushing of the teeth, to remove all food particles. The use of an efficient dentifrice encourages efficient brushing and helps to keep the teeth looking attractive.

Third, the inclusion in the diet of foods that require the chewing, tearing, gnawing and biting for which our teeth were designed, such as raw cabbage, celery, apples and other fibrous foods.

Fourth, a visit to the dentist at least twice a year, so that he can check the condition of the teeth. If every mother will follow this program, and train her children to follow it, the result will be a vast decrease in dental decay, and a forward step in human progress. For it is not too much to say that the SALVATION OF THE HUMAN RACE LIES IN SAVING ITS TEETH.

Write to C. Houston Goudiss, 6 East 39th Street, New York City, for information on How to Build and How to Maintain Healthy Teeth.

Questions Answered

Mrs. J. B. McK.—It is incorrect to say that rye bread is more, or less, fattening than white bread. A slice of rye bread supplies the same number of calories as a slice of white bread.

Mrs. E. T. D.—Answering your question as to the effect of cooking on vitamin D, this is no problem in the kitchen. Natural vitamin D is virtually absent from most foods, but in irradiated foods, or those to which vitamin D concentrate has been added, the vitamin D is stable and ordinary cooking has little destructive effect on it.

Miss F. S. P.—The sulphur dioxide used to bleach a good grade of dried fruit is present in a chemical combination that is entirely harmless.

Terence Shea Tells of His Bulging Barrels

A social worker with more enthusiasm than tact went to call upon Terence Shea, night watchman, at his home.

"I hope, Mr. Shea," she said, "that you do not squander your money in riotous living. May I ask what you do with your wages?"

"I'd just as soon tell you as not," replied Mr. Shea. "'Tis \$15 a week I make. When I've paid the rent, the provisions, and the milkman, and bought what's needed for Maggie and me five children, I deposit the rest of my money in barrels. Mostly, ma'am, sugar barrels. They're bigger an' hold more. But when I can't get them I use plain flour barrels."

Lesson for April 24

RECEIVING VISION FOR SERVICE

LESSON TEXT—Mark 9:2-10. GOLDEN TEXT—This is my beloved Son; hear him.—Mark 9:7.

PRIMARY TOPIC—On a Mountain with Jesus.

JUNIOR TOPIC—With Jesus on a Mountain Top.

INTERMEDIATE AND SENIOR TOPIC—How Worship Prepares Us for Service.

YOUNG PEOPLE AND ADULT TOPIC—The Place and Purpose of Vision.

"Where there is no vision the people perish" said the wise man of old (Prov. 29:18). For want of a true vision of God, a knowledge of His truth, and the God-given constraint which makes men give themselves in sacrificial service, the people will perish in their sins. But let men come to know the truth as it is in Christ, learn to know Him as the Son of God glorious and powerful, and then let them translate their knowledge of Christian truth and their personal spiritual experiences into the daily ministry to the needs of their fellow-men, and there will be songs of salvation and joy.

The transfiguration of our Lord meant much to Him as it brought new assurance of His divine Sonship, His acceptance with the Father, and His resurrection to follow the death of the cross. We do well to recognize its testimony to Him, but we think today especially of the experience of the disciples and their preparation for service. We, like them, must

I. Know Christian Truth.

Fundamental in both Christian life and service is a clear understanding of the person and work of Christ. One may come to Christ knowing little more than that He is the divine Saviour, and one may enter into Christian living with a meager knowledge of the doctrines of the Bible. But the Christian who fails to grow in knowledge will not grow in grace as he should.

The disciples came to a fuller conviction that He was the Son of God as they saw Him transfigured and heard the Father say, "This is my beloved Son." They learned more plainly the truth of His coming death for the sins of all mankind. They saw in the indescribable beauty of that moment the foregleam of His coming glory. What important truths these are—His deity—His redemption—His coming kingship. Do we have a clear grasp of these truths?

II. Experience Spiritual Power.

Great experiences of spiritual renewing and power are necessary to effective life and testimony. They may not be in outward manifestation, in fact they are more often in the inner recesses of the soul, but they transform men and send them forth to magnificent living for God.

The disciples had an unforgettable mountain-top experience. Even so have many others found the secret of power. It came to D. L. Moody as he walked down a New York street, praying in agony, "Deliver me from myself. Take absolute sway." The story of what happened to him and through him as a surrendered instrument in God's hand is written large on the pages of history. Others had similar experiences. Let us remember that such privileges are not reserved for a few, they are the birthright of every Christian. Power without knowledge is a dangerous and destructive thing, but knowledge without power is a dead thing, resulting in a stale and unfruitful orthodoxy that in turn produces a dreadful and unchristian religious system. It is not enough to know the truth, to be able to discuss it, to divide it, and possibly to fight about it. Let us study God's Word, but let the truth be baptized in the overflowing spiritual power of a personal experience with God.

III. Serve Needy Humanity.

Dr. Moore beautifully suggests that Jesus and the disciples went up to the place of prayer, into the place of glory, and down to the place of service. How fitting is that sequence. Much confusion exists in the church because those who have foolishly abandoned their interest in the truth of God's Word and have substituted the energy of the flesh for spiritual power, have been most diligent in service to humanity, while those who know and accept the truth about Christ, and who profess to believe in the power of the Spirit-filled life have failed to serve their needy neighbors. How delightful and useful is the normal, well-rounded life of the true Christian, one equipped with an understanding of Christian doctrine, endowed with Holy Ghost power, and humbly serving others.

Smiles

I am persuaded that every time a man smiles, but much more when he laughs, it adds something to this fragment of life.—Sterns.

Following After God

A heart rejoicing in God delights in all His will, and is surely provided with the most firm joy in all estates.

Patience a Virtue

Forbearing one another in love.—Ephesians 4:2.

Important Spring Fashions

A TWO-PIECE tailored dress for street and business, and a softly detailed afternoon dress that's especially becoming to large figures. Even if you're not an experienced sewer, you'll en-

joy making them, for the patterns are easy to follow and each includes a complete and detailed sew chart.

Dress With Jacket-Blouse.

Exactly the style you want for street wear, shopping trips and business. The jacket blouse is so attractive, with its puff sleeves,

fitted waistline and saucy little peplum. It can be worn with your spring suit skirt, too. Make it up in flat crepe, later in linen.

For Large Women.

A very graceful dress with slenderizing lines, thanks to the smooth shoulders, the cape sleeves, always flattering to plump arms, and the skirt that's narrow round the hips and slightly wide at the hem. Gathers beneath the raglan shoulders make the blouse soft and becoming. In georgette, flat crepe or polka dot silk, this will be your spring favorite.

The Patterns.

1477 is designed for sizes 14, 16, 18, 20, 40 and 42. Size 16 requires 2 yards of 39-inch material for the jacket and 2 yards of 39-inch material for the skirt.

1499 is designed for sizes 34, 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 36 requires 5 1/4 yards of 39-inch material. If contrasting collar is wanted, it requires 3/4 yard.

Spring-Summer Pattern Book.

Send 15 cents for the Barbara Bell Spring and Summer Pattern Book which is now ready. It contains 109 attractive, practical and becoming designs. The Barbara Bell patterns are well planned, accurately cut and easy to follow. Each pattern includes a sew-chart which enables even a beginner to cut and make her own clothes.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

ASK ME ANOTHER ?

A Quiz With Answers Offering Information on Various Subjects

The Questions

1. What was the most western outpost of the colonies during the Revolution?
2. What city stands on "seven hills"?
3. Was George Washington actually born on February 22?
4. The abbreviation "i. e." is used in the sense of "that is." For what Latin words do they stand?
5. What states were carved out of the Northwest Territory?
6. What did helium gas sell for during the World war and how much does it sell for now?
7. How much did it cost to send a letter by the famous Pony Express from St. Joseph, Mo., to San Francisco, Calif.?
8. Where are most of the under-water movies made?
9. What southern town has announced that henceforth a birth in the town would be announced by a toot of the local mill whistle?
10. Is it still against the law to print pictures of United States postage stamps?

The Answers

1. Fort Laurens, about a mile from what is now Bolivar, Ohio.
2. Rome, Italy.
3. Though George Washington actually was born February 11, 1731, it became February 22, 1732, through England's shift to the Gregorian calendar in 1752.
4. Id est.
5. Ohio, Indiana, Illinois, Michigan and Wisconsin.
6. In 1917 the gas was sold to non-government users for \$2,000 a cubic foot, and now the price is one cent per cubic foot.
7. At first the company charged \$5 for each half-ounce letter, and later the charge was reduced to \$2.50.
8. Approximately 90 per cent of

all under-water movies made in this country are taken at Silver Springs, Fla., because of the clearness of the water which eliminates camera difficulties.

9. Greenville, Ga.

10. The Treasury department has recently authorized newspapers and other publications to print pictures of United States postage stamps for the first time in history. Formerly prohibited because of possible aid to counterfeiters, the pictures were made possible by an act of congress sponsored by stamp collectors. Only black-and-white reproductions are permitted.

MEN LOVE GIRLS WITH PEP

If you are peppy and full of fun, men will invite you to dance and parties. BUT, if you are cross, lifeless and tired, men won't be interested. Men don't like "quiet" girls. For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure.

Make a note NOW to get a bottle of world-famous Pinkham's Compound today. WRITE FOR FREE LITERATURE TO THE FOLLOWING ADDRESS: LYDIA E. PINKHAM'S VEGETABLE COMPOUND.

Small, but Mighty

Small bodies with velocity have a greater momentum than large masses without it.—Bacon.

DON'T BE ASPIRIN-FOOLISH

Why risk cheapness of unknown brands—When St. Joseph is as pure—as genuine, as money can buy—so economical—8 1/2 doz. Tablets 35c—3 doz. 20c—1 doz. 10c.

Safe Course

Happy were men if they but understood—there is no safety but in doing good.—John Fountain.

TIPS to Gardeners

General Garden Care

MOST flowers should have little or no artificial watering until they are at least half grown.

To get better and larger flower blossoms, cease watering when buds have formed.

For a continuous bloom, pick flowers regularly. This is most important with sweet peas and pansies, less so with petunias.

Avoid the common mistake of letting vegetables grow too large before picking.

Root crops—radishes, carrots, beets—are at their best when hardly half grown.

Pick peas just before pods fill out completely. Pick corn just at the "milk" stage, when the kernel, gouged with the finger nail, yields a milky juice. Use summer squash when they are small, just after the blossom has dropped off.

Certain other vegetables, of course, must be allowed to mature. Tomatoes should be ripened well on the vine, as should winter squash.

Be Noble

"Be noble! and the nobleness that lies in other men, sleeping but never dead, will rise in majesty to meet thee own."—James Russell Lowell.

DO YOU WANT TO REDUCE Safely . . . Surely Scientifically?

Get This Free Bulletin Offered by C. Houston Goudiss

READERS of this newspaper are invited to write to C. Houston Goudiss, at 6 East 39th Street, New York City, for his scientific Reducing Bulletin, which shows how to reduce by the safe and sane method of counting calories. The bulletin is complete with a chart showing the caloric value of all the commonly used foods and contains sample menus that you can use as a guide to comfortable and healthful weight reduction. A postcard is sufficient to carry your request.

FIVE

WRONG? Well, yes—and no. The arithmetic of your school days taught that if "Mary had five dollars and spent two . . ." three dollars remained. But that is mathematics—not shopping!

In managing a home . . . guarding a limited family income . . . we've simply got to do better than Mary did. We must sharpen our buying wits . . . ascertain where the dollars of extra value lurk . . . take five dollars to town and get much more for the money spent.

Fortunately, there are ever-willing guides right at hand—the advertisements in this newspaper. Advertised merchandise is often exceptional value merchandise. It makes dollars S-T-R-E-T-C-H.

HELP KIDNEYS

To Get Rid of Acid and Poisonous Waste

Your kidneys help to keep you well by constantly filtering waste matter from the blood. If your kidneys get functionally disordered and fail to remove excess impurities, there may be poisoning of the whole system and body-wide distress.

Burning, scanty or too frequent urination may be a warning of some kidney or bladder disturbance.

You may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel weak, nervous, all played out.

In such cases it is better to rely on a medicine that has won country-wide acclaim than on something less favorably known. Use Doan's Pills. A multitude of grateful people recommend Doan's. Ask your neighbor!
